Certificate of Verification

The document herewith is a testimonial of the following specifics;

- AQAR 2022-23
- Criterion - II (Teaching-Learning and Evaluation)
- Metric no. – 2.3.2
- Metric Particular - **Teachers use ICT enabled tools for effective teaching-learning process.**

It is affirmed that the attached document pertinent to the above cited specifics are duly verified and approved by the IQAC.

Criterion Head

IQAC Coordinator

IQAC-Co-ordinator

Properties of Scalar and Vector

• Some Properties of Vector:

1) **Equality of two vectors:** Two vectors \vec{A} and \vec{B} are said to be equal if they have the same magnitude and point in the same direction i.e. $\vec{A} = \vec{B}$

2) **Negative of a Vector:** The negative of vector \vec{A} is defined as giving the vector sum of zero value when added to \vec{A} . That is, $\vec{A} + (-\vec{A}) = 0$. The vector \vec{A} and $-\vec{A}$ have the same magnitude but are in opposite directions.
