Objective of the Activity	To create environmental consciousness in community. Most important are forestry, land reclamation, and landscaping. To offer important environmental benefits. For sustainable production and improved soil, water quality and salinity mitigation, carbon and biodiversity benefits.
Brief Description	Tree plantation is the process of transferring of seedlings from one place to another. Department of Botany and NSS organized Tree plantation Programme. On this occasion Organizers stated that tree plays a significant role for all of us as well as for animals, insects, birds etc. As we know the famous phrase "Save trees, Save life". So, we acknowledge it and be a part of the plantation. Programme was organized under the guidance of Principal Dr. L. H. Khalsa. He said in his speech that trees are important for life on Earth. Trees give us shade. Trees give beauty to any place. Trees bear beautiful and colorful flowers. Trees are home to many animals, birds and insects. When trees are cut, these creatures lose their home. Trees are also food for man, and all herbivorous animals and birds. Insects also depend on trees to complete their life cycle.
