1. Background

Intellectual Property means the property represented by the product emanating from creativity of the human mind, human intellect and creative ideas. It can be an Invention, original Design, Trademarks, artistic creation, etc. These new activities brought about industrial, economical and cultural development in the society.

Intellectual Property is an asset and by acquiring a legal right over the property, the creator of the intellectual property seeks to ensure that he has exclusive right over it. Intellectual Property Rights (IPRs) are a set of exclusive rights protected by law which are accorded to creators or persons over their creations for a certain time period. An IP right holder can realize value from its intellectual assets through utilizing it internally for its own processes or share it externally through provision of goods and services to customers. The latter can be achieved through legal mechanisms such as licensing or assignment.

Intellectual Property Rights (IPRs) are considered as a barometer of R&D activities, encourages technology transfer, national / foreign direct investments & helps in technological / industrial development. Intellectual Property Rights (IPR) plays a vital role in enhancing the socio-economic prosperity of the country. Creativity and innovation are new drivers of the world economy. With the increasing relevance of Intellectual Property (IP) in this era of globalization, it is important to recognize the role which IP systems play in the growth of the Nation. Thus, there is a need to create large public awareness about the pivotal role of IPR in globalized knowledge economy. From last many years it was observed that, filing of IP applications in the country are not increasing despite significant contribution towards R&D by various students, institutes, scientist and R&D organizations. With the view to create awareness on the significance of IPR to the people from various sectors, our college organized a one day workshop on “Intellectual Property Rights (IPR)” at the college campus on 22nd February, 2019. The workshop was intended to cover various aspects of IPR like Patents, Copyrights, Trademarks, etc.

2. Aims & Objectives

The one day IPR awareness workshop mainly aims at establishing a basic level of IP awareness amongst the workshop participants, such that the chances of obtaining well-protected innovation (Patents) for their organizations.

Other objectives are given bellow:

Spread awareness about

- Importance and scope of IPR in Academic Researches.
- Types of innovations patentable & how to test your patentability of your innovations.
