### Abstract :

The present research paper discusses the role of Learning Resource Centers in the holistic development of students in the context of National Education Policy. Along with the changing knowledge, the learning resource center changes the nature of student-oriented and higher education in the stream of students. Through the learning resource center, students are highlighted on exemplary behavior, high thinking, realistic action, research attitude, scientific thinking, new technical approach to life, versatile personality, and talent. How these qualities can be inculcated through the Learning Resource Center has been discussed.

**Keywords:** National Education Policy, Learning Resource Centre, Inclusive Development

### Introduction:

Knowledge and education are important foundations for the overall development of human beings and accordingly knowledge and information tools, learning resource center and reading are important. If India wants to gain a place in the world, it is very important to provide quality education to the people at the grassroots level and to do it proactively. After a thoughtful study, it was realized that individuals are formed through study. The whole world is a library of means of action. The world is undergoing extraordinary changes in terms of knowledge tools like big data, machine learning, artificial

intelligence, etc. Also, libraries are equipped with smart libraries, digital libraries, Wi-Fi libraries, Li-Fi Library, Mobile Library, Web Library, Multimedia Library, Green Library, etc. They should be benefited from education and their name should be made at the world level, therefore the important role of the Learning Resource Center in the development of students has become very important.

Learning Resource Centers are social and educational learning mediums to the extent that technological advances increase or change the needs of readers. The librarian's classroom grows as new discoveries and tools become available, improvements and growth in the means by which knowledge is collected and disseminated have a profound impact on librarianship. In today's library, apart from books, different types of knowledge tools have to be stored. But there is a huge increase in Journals, Periodicals, magazines, booklets, maps, and other materials. Along with this, online tools in the form of the Internet have covered libraries and they have been transformed into learning resource centers and knowledge resources that widen the circle of knowledge.

### Importance of the subject :

In this modern era, National Education Policy considering the interests of students, latent qualities, activity, idealism, technological changes as well as the role of the Education Resource Center in the overall development of

students is very important and this is the importance of this topic.

#### Objective of the Subject :

1. Studying the National Education Policy and Learning Resource Centre.
2. To examine the role of Learning Resource Centers in promoting the holistic development of students in the context of National Education Policy.

#### National Education Policy :

The National Education Policy is the first education policy of the 21st century and aims to address the growing developmental needs of our country. An important feature of this National Education Policy is to build an education system that directly contributes to a just and vibrant knowledge society of India by making India a global knowledge superpower. It is clear in this policy that the curriculum and teaching methods of our educational institution inculcate strong respect for the fundamental duty and constitutional values of the student.

#### Students :

The National Education Policy particularly emphasizes the holistic development of every student. Education should develop not only cognitive abilities, but also basic literacy and numeracy skills and high-level logical and problem-solving skills, but also social, moral and emotional, technological, and digital skills. Students who become proficient in all areas of knowledge are able to develop themselves holistically.

#### According to NAAC, Library as a Learning Resource :

Talking about the library we have divided the format of the library into 20 marks in the new manual Institutional Accreditation Manual for Self Study Report Affiliated / Constituents Colleges NAAC January 2022 (will be effective from 1st June 2022). Learning Resource Center

provides online services with the help of ICT-based internet along with library services.

#### Role of Learning Resource Center in all-round development of students :

A variety of thinking and reflection materials are available in the Learning Resource Center. Every type of material is readable, inspiring and useful for students. The use of which increases qualities like versatility and imaginative devotion in the students. Regular use of reading materials makes students more positive and healthier, thereby enhancing their overall development and quality of life.

Today in the 21st century we cannot rely only on the old knowledge that exists but we need to have updated knowledge offline and online through the medium of ICT. As we are becoming scholars, poets, talented writers in learning resource center through offline and online tools. Many novels, autobiographies, anthologies, fine articles, dramas, one-act plays, and books of stories are entertained through the Learning Resource Center. It makes good use of time. We gain self-knowledge by reading the biography of a great person. Understands the reality of human life. This means that when a man becomes enlightened he knows good from bad and his personality starts to develop through the tools in this learning resource center the overall development of the students takes place.

#### Measures of Learning Resource Center in the holistic development of students :

1. A learning resource center should have a variety of reading materials available.
2. A Learning Resource Center should have an abundance of inspirational books.
3. Learning Resource Center should be influenced by ICT.
4. The staff in the Learning Resource Center should be technically trained and prompt.

5. The staff in the Learning Resource Center should be highly educated and research-oriented
6. The Learning Resource Center should be programmed accordingly.
7. The Learning Resource Center should have ICT tools available for information exchange.
8. Learning Resource Center should have an online agreement with other libraries at the National and International level through the internet.

### **Learning Resource Center and Holistic Development of Students :**

Books are of different types like inspirational, entertaining, spiritual, philosophical, topical books, reference books, general books, fine literature books, stories, novels, anthologies, etc. Books change personality, change subject and have a good effect on the human mind and accordingly versatility and creativity increase. Big Data, Machine Learning, Artificial Intelligence, etc. through Learning Resource Center. Also, libraries are smart libraries, digital libraries, Wi-Fi libraries, lo-fi libraries, virtual libraries, cloud base library, online libraries, techno savvy libraries, e-libraries, mobile libraries, web libraries, multimedia libraries, green libraries, etc. These should benefit the students and the overall development of the students should take place.

The following factors contribute to the holistic development of students through the Learning Resource Center. The human mind, reading books, and thinking power will increase, positive thinking, absence of bad thoughts, and versatility increases. Development of creative vision, personality development, and formation of students.

### **Depending on the type of book and the tools of the Learning Resource Center students can develop holistically :**

Syllabus Books - Educational development takes place. Research books - intellectual

development. Inspirational Books - Higher Mental Level Development, Literary book - increases creative power. Competitive Exam Books - Teach to fight, Autobiographies - Life changes through struggle, Stories - help to transform past into future, Novel - helps to increase imagination, Drama - shows the reality of life. Essays - Produces beautiful syntax. Poetry - Increases talent power, General books - Increases knowledge, Reference books - Increases specialized knowledge, Dictionary - Understands word concepts, Encyclopedia - Increases existing knowledge, Place Description Kosha - Information about various places.

As above there is knowledge of potential life change through reading depending on the type of books and indeed any of the above knowledge can bring about positive changes in the formation of students. Also, Internet, Computer, Big Data, Machine Learning, Artificial Intelligence, Smart Library, Digital Library, Wi-Fi Library, Lo-Fi Library, Virtual Library, Cloud Base Library, Online Library, TechnoSavvy Library, E-Library, Mobile Library, Web Library, Multimedia Library, Green Library, etc. All-round development of students can also be done by.

### **Conclusion:**

1. Learning Resource Center is the cornerstone of reading culture.
2. Reading development and overall development is very important for college students.
3. The research presented is important in the context of National Education Policy and Learning Resource Center.
4. The role of the Learning Resource Center is very important in National Education Policy.
5. All round development of college students is completed through Learning Resource Center.
6. College students' personalities are met through the Learning Resource Center.

7. A college student first goes to the Learning Resource Center for the information they need.
8. In this digital age, the learning resource center has gained great importance through the medium of Internet.
9. Personality development and overall development of students has a very important place in the New Education Policy.
