**MAHATMA GANDHI ARTS, SCIENCE & LATE N. P. COMMERCE COLLEGE,
ARMORI, GADCHIROLI**

DEPARTMENT OF GEOGRAPHY

Programme Specific Outcome:

- *The study of geography imbibes the sense of environmental awareness among the students.*
- *It helps to understand the delicate relationship of humans with the environment.*
- *The economic fringes of human life are also understood.*
- *It reveals the earth's surficial features and their origin.*

B. A. – Sem. - I (Introduction to Geography)

Course Outcomes –

After completion of this course, students will be able to:

- *Explain To know the meaning, definition, scope, study methods and study objectives of Geography.*
- *To discuss the importance of development of Geography.*
- *To examine the place of geography in other sciences or its relation to other sciences.*
- *To inform the students about the origin of the earth, the solar system, the origin of universe, the earth is a unique planet.*
- *To arouse the curiosity of the student regarding the size & shape of the earth, longitude, latitude, international date line, time zone.*
- *Solar eclipses, lunar eclipses to study their effects on human life.*
- *To study geography while studying human and environment.*
- *Ecology, Ecology, Environmental Determinism, Possibilism and Neo-determinism and giving students' knowledge about nature through this concept.*
- *Human and environment, physical and human geography, regional and systematic geography to know debates in geography.*
- *To give students a historical overview of ancient and medieval geography from the point of view of study.*
- *Creating career opportunities for geography students through geography.*
- *Matching job occupation through GIS remote sensing.*
- *Emphasis on adopting modern techniques and ideologies in geography.*
- *Convincing students about the origin of the map and globe under cartography and its usefulness in creation and human life.*
- *Explain the importance of scale in the creation of map.*
- *Emphasis on adopting modern techniques and ideologies in geography.*

B. A. – Sem. - II (Climatology)

Course Outcomes –

After completion of this course, students will be able to:

- *To create awareness among the students about the elements of weather. To learn about air temperature and humidity.*
- *To impart knowledge to the students about weather factors, atmospheric levels, atmospheric phenomena.*
- *Raising awareness about the effects of temperature, solar energy on the earth and human life.*
- *To study the effect of air pressure on the earth.*
- *To create curiosity in the students about wind, types of wind, the effect of wind on the earth.*

- *To impart knowledge to the concerned student on various meteorological factors like evaporation, humidity, condensation, dew, fog.*
- *What is rainfall, types of rainfall, types of clouds to know about these atmospheric factors?*
- *To create awareness among the students about the importance of monsoon in India.*
- *Understanding the impact of cyclones and anti - cyclone, recurrent storms on India and the world.*
- *To create awareness among the students about the effects and remedies of global warming.*
- *To study the classification of global climate and the effects of climate on human life.*
- *Teaching how to create maps and diagrams related to the weather.*
- *Explain how to study weather maps and its importance in human life.*
- *Teaching how to do land survey through chain survey.*
- *Introduce students to thermometers, air pressure gauges, wet and dry balloon thermometers, rain gauges, wind speedometers and directional devices.*

B. A. – Sem. - III (Geomorphology)

Course Outcomes –

After completion of this course, students will be able to:

- *Students about the importance of Geomorphology in the Arts branch.*
- *Knowing the definition, nature, scope of Geomorphology and place of Geomorphology in Physical Geography.*
- *Inform the student about continental drift theory by Wagoner, Plate Tectonics, Isostasy and discuss it.*
- *To enhance the knowledge of students regarding earthquakes and volcanoes.*
- *To know the process and type of weathering and related landforms.*
- *Provide information on the origin, composition and types of rocks.*
- *To know the work of the river as well as the erosion transportation and depositional work of river and Associate landforms.*
- *Discuss the cycle of erosion and interruption of cycle of erosion.*
- *Explain to the students how the river rejuvenation takes place.*
- *Awareness of measurement of a particular area through plane table survey.*
- *In depth study of different regions from the map through climatic and topographic maps.*
- *Map science cartography makes it easy to study information from different parts of the world.*
- *Creating awareness about the importance of Geomorphology in competitive examination.*

B. A. – Sem. - IV (Geomorphology and Oceanography)

Course Outcomes –

After completion of this course, students will be able to:

- *Convincing students of the importance of geomorphology and oceanography in geography.*
- *Information about glacier types of glacier and erosion and depositional work of glaciers.*
- *To inform the students about the landforms associated with the work of Valley glaciers.*
- *Function of wind in arid regions to know the landforms formed by wind erosion and depositional work.*
- *Provide information on work of underground water and karts to topography.*
- *Explain how sea waves work in coastal regions and how to develop new landforms due to erosional and depositional work of sea.*

- Provide information regarding definition of Oceanography, surface configuration of ocean floor, Continental shelf, Continental slope, abyssal plain, mid-oceanic ridge and trenches.
- Knowing the distribution of temperature and salinity in the sea and oceans.
- To provide information to the students about the circulation of ocean water, waves, Tides and currents, El Niño and La Niña etc.
- Knowing the importance of the ocean as storehouse of resource for the future,
- Have students create Maps with the help of map projection.
- Studying statistical methods through mean deviation, standard deviation and quartile deviation.

B. A. – Sem. - V (Geography of Maharashtra)

Course Outcomes –

After completion of this course, students will be able to:

- To know information about location, extension, administrative division of Maharashtra.
- Physical division of Maharashtra explaining the physical importance of the mountains, plateaus and plains.
- To inform the students about the river system in Maharashtra, importance of rivers, types of rivers.
- To know the climate of Maharashtra. To understand the climatic region.
- To know the importance of forests in Maharashtra and its economic importance.
- To learn about the main crops of agriculture in Maharashtra, to explain to the students the characteristics of rice, wheat, sugarcane, cotton.
- To inform the students about the Minerals and power resources in Maharashtra.
- To explain to the students about the agro-based industries in Maharashtra.
- To inform the students about the population of Maharashtra, population density, distribution, factors affecting the density.
- To make the student aware of the consequences of the population of Maharashtra.
- To know about the population migration in Maharashtra, the reasons for rural and urban migration.
- Explain reduction and enlargement methods in map making.
- To teach how to use prismatic compass in land survey.
- Helps to analyse various elements in the map through dot methods, choropleth methods, bar graph and lines graph.
- To enhance the technical knowledge of the students through GIS, remote sensing and computer.

B. A. – Sem. - VI (India: A Geographical Analysis)

Course Outcomes –

After completion of this course, students will be able to:

- Students learn about location expansion in India.
- Understanding the Geographical Concepts of the physical region- mountain, plain & Plateau of India.
- To provide information about rivers and their divisions in India.
- To discuss the climate of India, the characteristics of the Indian climate.
- To analyse information related to climatic regions of India, distribution of rainfall in India.
- Monsoon, Convincing students about the importance of monsoon in India.
- Discuss information on iron ore, manganese and its distribution in India.
- Explain the economic importance of power plants, coal, petroleum, hydropower plant and distribution in India.

- *To create awareness among the students about population in India based on various concepts like population, population density, population structure, population problems.*
- *Discussion on the nature of urbanization in India, the problems of urbanization and its consequences.*
- *To emphasize the importance of agriculture by discussing with the students on various topics related to agriculture in India, the place of Indian agriculture in the economy features of Indian agriculture, problems of Indian agriculture.*
- *To study geographical correlation through correlation.*
- *Teaching how to use dumpy level equipment in ground level.*

DEPARTMENT OF ECONOMICS

Programme specific outcomes (PSO) –

The students understand the basic concept of in Economics and can apply in the real life. He/She is also update with the recent trends in the subject. The students also build a sound base for various post graduate courses in Economics.

B. A. I Sem. I

Course Outcomes

Paper I- Micro economics

After successfully completion of the course students will be able to-

- *Understand Basic concept of micro economic such law of demand, supply and elasticity.*
- *Understand Theory of Production function, law of returns, law of variable proportion.*
- *Understand Law of Utility and Application of Indifference Curve. & Engles law*

B. A. I Sem. II

Course Outcomes

Paper I- Micro economics

After successfully completion of the course students will be able to-

- *Understand Prize determination under perfect competition*
- *Understand Equilibrium of Industry and firm.*
- *Understand The decision making process in different market situation such as monopoly and monopolistic etc.*
- *Understand Understand the rent, wage, interest and profit theory.*
- *Understand the welfare theories.*
- *Understand Analyses the statistical average.*

B. A. II Sem. III

Course Outcomes

Paper I- Macro economics

After successfully completion of the course students will be able to-

- *Understand Concept and function of money.*
- *Understand Quantity theory of money and cash balance approaches.*
- *Understand Inflation, Deflation, index number & trade cycle.*
- *Understand Law of Market- Keynesian theory of employment.*
- *Understand Theories of consumption function and investment function*

B. A. II Sem. IV

Course Outcomes

Paper I- Macro economics

After successfully completion of the course students will be able to-

- *Understand Function of Commercial and central bank- modern banking service.*
- *Understand Public finance – income and expenditure, GST*
- *Understand International Trade theories*
- *Understand International Monetary fund- World bank, WTO and BRICS.*

B. A. III Sem. V

Course Outcomes

Paper I- Indian economy

After successfully completion of the course students will be able to-

- *Understand Concept of developed and developing economy.*
- *Understand the population theory and Indian population policy.*
- *Understand Meaning and concept of poverty.*
- *Understand the inequality in India- cause and measures.*

- *Understand place of agriculture in Indian economy and agriculture marketing.*

B. A. III Sem. VI

Course Outcomes

Paper - Indian economy

After successfully completion of the course students will be able to-

- *Understand the concept of small and cottage industries, Function of trade union.*
- *Understand the concept of economy planning and five year plans.*
- *Understand the functions of NITI Ayog.*
- *Understand the composition and direction of Indian foreign trade.*
- *Understand basic concept of ecology environment and economy*

**MAHATMA GANDHI ARTS, SCIENCE & LATE N. P. COMMERCE COLLEGE,
ARMORI, GADCHIROLI
DEPARTMENT OF SOCIOLOGY**

PROGRAMME SPECIFIC OUTCOMES

Sociology seeks to understand all aspects of human social behavior, including the behavior of individuals as well as the social dynamics of small groups, large organizations, communities, institutions, and entire societies. Sociologists are typically motivated both by the desire to better understand the principles of social life and by the conviction that understanding these principles may aid in the formulation of enlightened and effective social policy. Sociology provides an intellectual background for students considering careers in the professions or business. Graduate student of Sociology should be able to develop.

- *Critical Thinking:
The programme seeks to develop in students the sociological knowledge and skills that will enable them to think critically and imaginatively about society and social issues.*
- *Sociological Understanding:
The ability to demonstrate sociological understandings of phenomena, for example, how individual biographies are shaped by social structures, social institutions, cultural practices, and multiple axes of difference and inequality. Written and Oral Communication: The ability to formulate effective and convincing written and oral arguments.*
- *Better understanding of real life situation:
The ability to apply sociological concepts and theories to the real world and ultimately their everyday lives.*
- *Analytical thinking:
Field survey and preparation of dissertation paper is an inseparable part of Sociology Programme. Students have to collect primary data for census as well as his/her research topic and analyze the data to draw conclusions. So, qualitative and quantitative analytical skills are enhanced.*
- *Observation power:
A sensible observation power is necessary to identify the research problems in field study. So a perception about human society slowly grows up.*
- *Professional and Career Opportunities :
Students will have the opportunity to join professional careers in Sociology and allied fields. Sociology provides an intellectual background for students considering careers in business, social services, public policy, government service, nongovernmental organizations, foundations, or academia. This programme lays foundation for further study in Sociology, Social work, Rural Development, Social Welfare and in other allied subjects.*

- *To recognize the importance of the housing needs principles and planning to gain personal family and social goals.*
- *To gain basic knowledge of the role in furnishing (carpets and rugs, cartons) of residential home for daily family life satisfaction.*
- *To provide skills regarding methods of interior decoration.*

- *To introduction job potentials in Home Economics education to the students.*
- *To motivate and train the students for self-employment.*
- *To aware of basic principles of Arts.*
- *To develop skills of preparing flower bouquets / baskets arrangements, artificial flowers and other useful items for decoration selling to enhance employability.*
- *To develop skills in knitting and fabric work.*

B. A. Semester - III Paper: - Food and Nutrition

- *Introduction of Food, Nutrition, Dietetics and Functions of Food.*
- *To promote basic knowledge pertaining to various food groups and nutrients.*
- *To realize the digestive system.*
- *To relate the composition of foods to their various properties.*
- *To promote understanding of common nutritional disorders due to the deficiency of nutrients.*
- *To learn principles of diet planning and use of balance diet in meal planning of family members.*
- *To recognize energy requirement for secondary, moderate and heavy workers.*
- *To develop the skill in cooking as per macro and micro nutrients.*

B. A. Semester - IV Paper: - Health and Nutrition

- *To develop ability to improve the nutritional quality of food.*
- *To develop food preparation, types of cooking and care ability.*
- *To recognize food preservation, food spoilage and adulteration in food.*
- *To provide knowledge about causes, symptoms of diseases and modification of normal diet for therapeutic purposes.*
- *To apply principles of dietary management.*
- *To plan, calculate and prepare diets for common ailments.*
- *To comprehend concept of community nutrition, communication and understand the techniques of nutrition education.*
- *To develop the skill in cooking as per improving nutritional quality of food, food preservation and regional cookery.*

B. A. Semester - V Paper: - Prenatal and Infancy Development

- *To introduce the students to the field of child development. Its concept, scope and importance.*
- *To recognize difference of growth and development, stages and principals of development. 3) To understand the biological and physiological foundation of development.*
- *Introduction of female reproductive system.*
- *To realize the prenatal development and causes, characteristics and care of premature child.*
- *To aware the importance of immunization for pregnant woman and child.*
- *To sensitize the students to interventions in the field of child development.*

B. A. Semester - VI Paper: - Child Development

- *To appreciate sequential ages of development during child-hood.*
- *To understand the play, leadership and discipline very importance of development.*
- *To realize the causes and prevention of Juvenile Delinquency.*
- *To sensitize students about child-hood behaviour problems.*
- *To understand and appreciate the importance of parent-child relationship.*
- *To develop in students creative ability related to children leading to enhanced employability.*
- *To develop the skill in cooking, stitching and knitting.*

**MAHATMA GANDHI ARTS, SCIENCE & LATE N. P. COMMERCE COLLEGE,
ARMORI, GADCHIROLI**

PROGRAMME OUTCOME – COMMERCE FACULTY

PROGRAMME OUTCOMES

- *Students will get thorough & fundamental knowledge of Commerce, Management, Economics, Accounting, Statistics, Taxation & Audit.*
- *This Programme will fulfill the requirement of well-trained manpower for Finance Companies, Banking Sector, Insurance Companies, Transport, Warehouse etc.*
- *Students can become successful Businessmen, Entrepreneur, Tax Consultant, Auditor, Accountant.*

❖ PROGRAMME SPECIFIC OUTCOMES

- *Students will have choices to pursue professional courses like CA, ICWA, CS, CMA, M.COM, MBA etc.*
- *Programme curriculum offers specializations and practical exposures which prepares students to face the challenges in business, trade & commerce in today's era.*
- *Students will be eligible & employable for functional areas like accounting, banking, insurance, capital market & corporate world.*
- *Students will acquire the skills like effective communication, decision making, problem solving, drafting commercial letters, business reports etc.*
- *Students will learn practical use of Cost & Management Accounting for their future career/business.*
- *Students will be able to understand & prepare financial accounting for their future career/business.*
- *Students will have knowledge of business economic analysis in the formulation of business policies, strategies & decisions.*
- *Managerial skills will be developed in the students which will be useful for their career & business.*
- *Idea of application of statistical tools and techniques in business decision-making will be developed.*
- *Knowledge & awareness about various laws related to trade, commerce & business will be increased.*

Course Outcomes

B.Com.-I Year Semester - I (CBCS)

Business Economics – I

- *Understanding of economic analysis in the formulation of business policies, strategies & decisions.*
- *Idea of using economic reasoning to solve problems of business.*
- *Enables students to understand factors determining market demand.*
- *Provide idea of the elasticity of demand & demand analysis.*
- *Understanding of production function & law of variable proportion.*
- *Develops understanding of Factors of Production.*
- *Enable students to understand Malthus' theory of population.*
- *Provide idea about policy adopted by china for population.*
- *Create awareness about current policy for population adopted by India*

Principles of Management – I

- *Provide a basis of understanding to the students with reference to working of business organization through the Process of Management.*
- *Acquaint the Students with the basic concept, principles and functions of management.*
- *Make students aware about the recent trends in management.*
- *Understanding the nature of management.*
- *Make awareness about importance and function of management.*
- *Provide knowledge about evaluation of management.*
- *Idea about Indian Management Thoughts.*
- *Enable students to understand importance, types, levels, advantages of planning.*
- *Idea of forecasting & its techniques.*
- *Develop knowledge about types- process & techniques of decision making.*
- *Idea of elements of organizing and processes.*
- *Understanding of delegation of authority & decentralization.*
- *Create awareness about recent trends in management*
- *Idea of social responsibility of management & management of change.*
- *Acquaint the students about management of crisis & stress management.*
- *Understanding about Total Quality Management.*

Financial Accounting-I

- *Provide basic accounting knowledge as applicable to business.*
- *Acquaint the students with the emerging issues in business, trade and commerce.*
- *Enables students understanding regarding recording, maintaining and presenting the accounting and financial facts.*
- *Basic knowledge of book keeping and accountancy*
- *Enable students to understand journal, ledger, cashbook and trial balance*
- *Idea of accounting standards, accounting policies and their discloser.*
- *Detail practical knowledge of final accounts of trading co-operative societies.*
- *Idea of depreciation accounting in detail.*
- *Practical exposure of methods of recording depreciation*
- *Practical knowledge of preparation of receipt and payment account.*

- *Idea of preparing income and expenditure accounts.*
- *Practical understanding of professionals accounts.*

Statistical Techniques & Business Mathematics – I

- *Knowledge and understanding of important basic statistical tools.*
- *Idea of application of statistical tools and techniques in business decision-making.*
- *Understanding of the concept, nature, scope, functions & significance of statistics.*
- *Idea of primary and secondary data, methods & it's sources.*
- *Develop understanding of presentation of statistical data.*
- *Provide practical exposure on measures of central tendency*
- *Provide practical exposure on nature, measures of dispersion*
- *Practical understanding of range, standard deviation, co-efficient of variation, mean deviation etc.*
- *Theoretical knowledge of concept, type, causes and different measures of skewness.*
- *Practical exposure on skewness, measures of inter quartile rang and quartile deviation*
- *Understanding statistics and mathematics elementary application to business example.*
- *Basic knowledge of business mathematics.*
- *Practical knowledge of simple and compound interest calculation.*
- *Practical knowledge of percentages in of business mathematics.*

Human Resource Management – I

- *Understanding the basic concepts of human resource management*
- *Enables students to understand objective, functions and significance of human resource management.*
- *Make aware about types and sources recruitment.*
- *Enable students to understand process and steps of selection.*
- *Provide idea about objectives & types of interview.*
- *Knowledge about objectives & steps of induction*
- *Basic knowledge of importance & methods of training.*
- *Enable students to understand process and technique of management development.*
- *Facilitate the knowledge about performance appraisal and it's different methods.*
- *Provide an idea about job evaluation*
- *Create awareness about motivation & methods of motivation.*
- *Understanding of morale and productivity*
- *Basic idea of core dimensions of job enrichment.*
- *Understanding of executive stress.*
- *Provide idea of the factors effecting wage determination & incentive plans.*
- *Create awareness about profit sharing & fringe benefits.*

B.Com.-I Year Semester – II (CBCS)

Business Economics – II

- *Understanding about pricing under various market conditions.*
- *Enable students to understand perfect competition, monopoly monopolistic competition.*
- *Develops understanding of cost analysis.*

- *Make aware about short run & long run cost analysis*
- *Provide idea about accounting costs and economic costs.*
- *Enable students to understand concept of economic rent*
- *Provide knowledge about various theories of rent.*
- *Create awareness about money-wages and real wage, causes of wage differentials.*
- *Know the theories of interest.*
- *Unable students to understand the theories of profit.*

Principles of Management – II

- *Basis of understanding of principles & techniques of direction.*
- *Idea of process functions, barriers of communication.*
- *Enable students to understand the meaning & importance of motivation.*
- *Create awareness about various theories of motivation.*
- *Understanding the concept leadership in detail.*
- *Idea of need & techniques of co-ordination.*
- *Knowledge about need, process & techniques of control.*
- *Create awareness about new trends in management.*
- *Understanding of business ethics*
- *Idea about disaster management & event management.*

Financial Accounting-II

- *Practical knowledge of Hire purchase and Installment purchase System.*
- *Theoretical knowledge of legal provision and rights of vendor and purchaser under both purchases system*
- *Practical exposure of Accounting treatments in the books of purchaser and vendor*
- *Enable the students to understand Consignment Account.*
- *Practical & Theoretical knowledge of Branch accounts excluding foreign branch.*
- *Practical knowledge of Royalty A/c in minimum rent account method.*

Statistical Techniques & Business Mathematics – II

- *Basic knowledge of correlation & its types.*
- *Practical exposure on Karl Pearson Co-efficient for Ungrouped & Grouped data.*
- *Practical knowledge of Spearman's rank correlation & Regression (Simple)*
- *Theoretical knowledge of Concept of Index Number,*
- *Practical exposure on various methods of Index Number. (Fisher , Dorbish and Bowle, Pasche & Lasprey's method)*
- *Basic Knowledge & Practical exposure on Chi-Square Test*
- *Understanding the use of ratio & Proportion in Business mathematics.*
- *Practical exposure on Profit & Loss in Business mathematics.*

Human Resource Management – II

- *Enables students to understand basis ,causes.policy of Promotion.Demotion and Transfer.*
- *Knowledge about Types , Objectives & Principles of Transfer policies*
- *Make aware about causes, effects & measures to reduce Workers absenteeism.*
- *Detail knowledge of causes, effects & measures to reduce Labour turnover.*

- *Basic Idea of Lay-off.*
- *Acquaint the students Role of Human Resource Development Manager.*
- *Enable students to understand the need for separate department for human resource development.*
- *Make aware about Function & Qualities of successful HR Manager*
- *Enable students to understand Professionalization of Human Resource Development in India*
- *Create awareness about Development, Establishment, Objectives & Activities performed by the Indian Management Institutes.*
- *Understanding the concept Human Resource Development.*
- *Enable students to understand Human Resource Planning.*
- *Provide idea about Career Planning and Career Development.*
- *Make aware about the concept Quality Circle.*
- *Develops understanding of Human Resource Accounting.*

B.Com.-II Year Semester – III (CBCS)

Company Law

- *Develop conceptual understanding of the fundamentals of company law and procedure requirements.*
- *To impart skills in law.*
- *Enable students to understand Joint Stock Companies.*
- *Make aware about Private and Public Companies.*
- *Introduce and develop knowledge about Holding companies and subsidiary companies.*
- *Enable the students to gain an idea of conversion of private into public & private into public.*
- *Provide knowledge about Formation of Companies.*
- *Create awareness about functions, duties, liabilities of promoters.*
- *Enable students to understand Memorandum of Association and Articles of Association.*
- *Make students aware about Prospectus in detail.*
- *Develop understanding of Kinds of Share Capital & Procedures for the issue of share.*
- *Detail knowledge about Share Allotment and Share Certificate.*
- *Make aware about Membership of a Company.*
- *Provide knowledge about Duties, Liabilities, Powers & Legal Position of Directors.*

Monetary Economics – I

- *Enable students to understand the nature, functioning and issues related to money.*
- *Impart detail knowledge about Paper Currency and Its Kinds.*
- *Make aware about Impact of fake currency in Indian Economy.*
- *Develop conceptual understanding of Methods of Note Issue.*
- *Provide knowledge of Modern Monetary system.*
- *Impart detail knowledge about ATM, Credit & Debit card, ECS & EFT etc.*
- *Enable students to understand causes , effects & remedies of Inflation and Deflation.*
- *Basic Idea of Banking , It's evolution & types.*

- *Create awareness about Functions of Commercial Banks.*
- *Idea of Credit Creation by Commercial Banks.*
- *Knowledge and understanding of Functions of central bank.*
- *Enable the students to understand Repo and Reverse Repo Rate.*
- *Detail knowledge about Evolution, Objectives , functions , Achievements of world bank. 14. Make students aware about World Bank and India.*

Corporate Accounting

- *Enable the students to understand Flootation of joint stock companies and their capital structure.*
- *Enable students to prepare accounting for issue and forfeiture of shares, re-issue of forfeited shares*
- *Facilitate the knowledge about Issue and redemption of debentures.*
- *Practical exposure on Final Accounts of joint stock companies with reference to companies act.*
- *Theoretical knowledge of features, valuation & factors influencing valuation of goodwill. 6. Practical knowledge of Valuation of Goodwill & its methods.*
- *Understanding the need for valuation of shares, factors influencing valuation of shares.*
- *Practical exposure on Valuation of Shares& its methods.*

Cost Accounting-I

- *Provide Basic Knowledge and Understanding of Cost Accounting.*
- *Enables students to understand importance of Cost Accounting in Business and Industry.*
- *Create awareness about the concept of overhead cost.*
- *Practical exposure by Problems relating to Cost-Sheet.*
- *Understanding the preparation of tender sheet.*
- *Enable the students to understand about Needs & Causes of Reconciliation.*
- *Facilitate the idea of preparation of Reconciliation Statement.*
- *Make students aware about Principle& Application of Process Costing.*
- *Practical exposure on Process Costing.*
- *Understanding of Features & Types of Contract Costing.*
- *Develop the knowledge about Certified Work, Uncertified Work.*
- *Practical exposure on one or two contracts for one year.*

Organizational Behaviour

- *Enables students to understand the conceptual framework of organizational behaviour.*
- *Provide idea of Nature of Organizational Behaviour.*
- *Understanding of Foundation of Individual Behaviour.*
- *Enable students to understand Personality and Organizational Behaviour.*
- *Provide idea about Perception, Learning Attitudes and Organizational Behaviour.*
- *Understanding of Attitudes, values and Job Satisfaction.*
- *Create awareness about Basic Motivational Concepts.*
- *Enable students to understand Factors of Motivation, Objective, kinds, and Techniques of Motivation.*
- *Make aware about Incentives & it's Types of Incentives.*

- *Facilitate the knowledge about Theories of Motivation.*
- *Basic Idea of Job Enlargement, Enrichment, Job Rotation.*

B.Com.-II Year Semester – IV (CBCS)

Secretarial Practice

- *Develop conceptual understanding of the fundamentals of secretarial practice.*
- *Impart skills in drafting notices, resolutions, minutes, reports, etc.*
- *Provide knowledge of Appointment, Remuneration, Powers and Duties of manager & director.*
- *Impart detail knowledge about Company Secretary.*
- *Make awareness about Company Meetings, Statutory Meeting, Annual General Meeting etc.*
- *Idea of Extra Ordinary General Meeting, Meetings of Directors.*
- *Enable students to understand Law and Practice of Company Meetings.*
- *Conceptual understanding of Profit and Dividend.*
- *Theoretical knowledge of Account and Audit.*
- *Develop knowledge & skills about various types of Company reports.*
- *Create awareness about Certificate for Commencement of Business.*

Monetary Economics – II

- *Enable the students to understand the Role of finance in economy.*
- *Acquaint the concept of mutual fund.*
- *Make students aware about Public finance*
- *Detail Knowledge and understanding of Sources of Public Revenue.*
- *Idea of The Principle of Maximum Social Advantage.*
- *Facilitate the knowledge about Modern trade and Commerce*
- *Understanding the Commodity exchanges.*
- *Introduction of Stoke exchanges & Online trading.*
- *Create awareness about Security & Exchange Board of India*
- *Knowledge about primary capital market.*
- *Make aware about National Stock Exchange.*
- *Enable the students to understand the Bombay Stock Exchange.*

Corporate Accounting – II

- *Practical knowledge of preparation of Final Account of Banking companies Act.*
- *Practical exposure on Final Accounts of General Insurance Companies in the latest prescribed form.*
- *Preparation of Revenue Accounts of fire, Marine and Accident insurance business.*
- *Practical exposure on Profit Prior to Incorporation of Joint stock company.*
- *Practical knowledge of Winding up of Companies.*
- *Theoretical knowledge of Types of winding up.*
- *Enable students to prepare liquidators final statement of accounts.*

Management Accounting

- *Basic Knowledge and Understanding of important Management Accounting to Business and Industry*
- *Understanding of the various tools and techniques of Management Accounting.*
- *Enable the students to understand Business Budgeting.*
- *Practical exposure on Flexible Budget & Cash Budget.*
- *Practical exposure on Break Even Analysis.*
- *Idea about the computation of Break Even Analysis.*
- *Practical exposure on Profit- Volume Ratio, Margin of Safety.*
- *Understanding of Variable Cost and Fixed Cost.*
- *Make students aware about Nature, Significance and Limitation of Ratio Analysis.*
- *Idea of Computation of Ratios relating to Trading and Profit and Loss Account and Balance-Sheet.*
- *Basic idea of computation of various ratios for management accounting.*
- *Facilitate the idea of Importance and Limitations of Fund Flow Statement.*
- *Practical knowledge of Preparation of Schedule of Changes in Working Capital and Fund Flow Statement.*

Organizational Behaviour – II

- *Facilitate the knowledge about Group Behaviour and Leadership.*
- *Idea of creation of Group Behaviour in the organization.*
- *Make students aware about concept of Leadership, Characteristics, Types and Qualities of Leadership.*
- *Enable students to understand Power and Politics.*
- *Understanding of Role and Importance, Types & Essentials of Effective Communication. 6. Basic Idea of Management of Organisational Conflicts.*
- *Create awareness about Organisational Culture. 8. Detail Knowledge and understanding of Human Resources Policies and Practices.*
- *Facilitate the knowledge about Training and Development & It's methods.*
- *Make aware about Work Stress & Measures of Reducing the Stress.*

B.Com.-III Year Semester – V (CBCS)

Auditing

- *Develop conceptual understanding of the fundamentals of Auditing.*
- *Enable students to understand Origin and Growth of Auditing.*
- *Provide knowledge about Objects & Necessity of Auditing.*
- *Enable students to understand about Detection and Prevention of Fraud.*
- *Create awareness about Classification of Audit.*
- *Facilitate the knowledge about Statutory Audit.*
- *Provide knowledge about Objectives of Govt. Audit and Commercial Audit.*
- *Make students aware about Continuous Audit, Annual Audit.*
- *Create awareness about Audit Planning.*
- *Enable students to understand Vouching, Subsidiary Books.*
- *Provide knowledge about International Check and Internal Control.*
- *Facilitate the knowledge about Audit of Ledger.*
- *Idea of Capital and Revenue Items.*
- *Make students aware about audit of Bank, Insurance Companies, Co-Operative Societies and Educational Institutions.*

Indian Economics - I (Urban)

- *Expose students to a New approach to the study of the Indian Economy.*
- *Understanding the structure of the Indian urban economy.*
- *Understanding about trend of urbanization in India.*
- *Enables students to understand Economics growth & Development of India.*
- *Create awareness about National Income & National Production.*
- *Idea of Industrialization & Urbanization.*
- *Create awareness about New Economics reforms.*
- *Understanding of Economic Planning & Public Finance.*
- *Idea of Public Debt & Public revenue.*
- *Make aware about economic planning in India.*
- *Enables students to understand urban population in India & Unemployment.*
- *12.Create awareness about Urban poverty & Economic Inequality in India.*

Advance Accounting – I

- *Provide Basic Knowledge and Understanding of Vendor and purchasing Companies.*
- *Enables students to understand Purchase Consideration- Accounting Entries.*
- *Practical exposure on Accounting for Amalgamation.*
- *Theoretical knowledge of Social Accounting and Social Reporting.*
- *Idea of Accounting for Absorption.*
- *Practical exposure on Preparation of Balance Sheet after Absorption.*
- *Understanding the Farm Accounting.*
- *Practical exposure on Accounting for Internal External Reconstruction.*
- *Idea of Preparation of Balance sheet after Internal & External Reconstruction.*
- *Practical knowledge of General Insurance claim accounts.*
- *Provide Basic Knowledge of Claim for Loss of stock.*

Business Communication

- *Develop Necessary Techniques and Skill of Communication.*
- *Introduce Communication Concepts Process, Elements of Communication.*
- *Make students aware about Objective and Importance of Communication.*
- *Facilitate the knowledge about Types of Communication.*
- *Idea of Supervisory Systems and Grapevine Communication.*
- *Enable students to understand The Art and Science of Public Speaking.*
- *Develop skills of Business Writing.*
- *Idea of drafting Commercial Letters.*
- *Develops skills of preparing business report.*

Commercial Law

- *Develop conceptual understanding of the fundamentals of Commercial Law.*
- *Enable students to understand Indian Contract Act 1872.*
- *Make students aware about legal provisions under Contract Act 1872.*
- *Facilitate the knowledge about Indian Contract Act 1872.*
- *Provide idea legal provisions of Partnership Act 1932.*

- *Idea of Rights and liabilities and Duties of Partners & Dissolution of Partnership.*
- *Create awareness about Sale of Goods Act 1930.*
- *Facilitate the knowledge about legal provisions under Negotiable Instrument Act, 1881.*
- *Make students aware about Consumer Protection Act, 1981.*

Industrial Relations (HRD)

- *Develop conceptual understanding of Industrial Relations.*
- *Make students aware about Role of Government in Industrial relations.*
- *Facilitate the knowledge about Workers Participation in Management.*
- *Create awareness about Evolution, objects and functions, role of trade union.*
- *Idea of Industrial Relations and Public Sector.*
- *Develop conceptual understanding of Collective Bargaining & essential for successful collective bargaining.*
- *Make students aware about Grievance and Discipline & Machinery for handling Grievance.*
- *Make students aware about legal provisions under Prevention and Settlement of Disputes in India*
- *Idea of the role of the State in industrial relations.*

B.Com.-III Year Semester – VI (CBCS)

Income Tax

- *Enable students to understand basic concept of Income Tax.*
- *Basic Knowledge of Residential States.*
- *Introduction of Five Income Heads of Income Tax.*
- *Practical exposure on Deduction under chapter VI.*
- *Provide knowledge about Computation of taxable Income from salary.*
- *Practical exposure on Income from House Property.*
- *Facilitate the knowledge about Income Exempt from Tax.*
- *Practical exposure on Income from other sources.*
- *Theoretical knowledge of PAN and TAN.*

Indian Economics – II (Rural)

- *Make aware about Indian Agriculture.*
- *Idea of Agriculture price commission.*
- *Understanding the Agriculture marketing.*
- *Create awareness about Land Reforms in Rural India.*
- *Understanding of Importance of forest in Indian rural economy.*
- *Enables students to understand National Agriculture policy & State Agriculture policy.*
- *Idea of National Agriculture Insurance scheme.*
- *Facilitate the knowledge about Rural Development in India.*
- *Awareness about Rural Development & water Management.*
- *Idea of Finance & Micro Finance for Rural Development*

Advance Accounting – II

- *Basic Knowledge and Practical exposure on Accounts of Holding Companies*
- *Theoretical knowledge of Government system of Accounting*
- *Practical exposure on Investment Accounts.*
- *Detail Theoretical knowledge of Human Resource Accounting.*
- *Practical exposure on Accounts from Incomplete Records.*
- *Basic Knowledge on conversion of single entry into double entry.*
- *Practical exposure on Double Account system.*
- *Idea of Accounting in public Utilities, Electricity, Gas & water Supply Company.*

Business Communication – II

- *Facilitate the knowledge about Communication Media.*
- *Make students aware about application advantages and disadvantages.*
- *Enable students to understand Organizational Communication.*
- *Create awareness about Company Manuals, House Journals, Placement Broachers, and Information Booklets.*
- *Knowledge about Designing and Organizing Trade Fair and Conference.*
- *Idea of Functions of Public Relation Officer.*
- *Conceptual knowledge of Corporate image, Creation of a Public image.*
- *Introduction of Legal Aspects of Business Communication, Recent trends in Communication.*
- *Idea of Global Communication for E- Business.*
- *Detail theoretical knowledge of Modern forms of Communication-Fax, E-Mail, and Video Conferencing*

Corporate Law

- *Develop conceptual understanding of the fundamentals of Corporate Law.*
- *Introduction of Factories Act, 1948.*
- *Make students aware about Provisions relating to Labour, health, Welfare, Safety.*
- *Facilitate the knowledge about legal provisions under Industrial Disputes Act, 1947.*
- *Create awareness about Provisions and Rules of strikes, lock outs, Lay off and Retrenchment.*
- *Make students aware about Right to Information Act, 2005.*
- *Enable students to understand Cyber Laws in detail.*
- *Detail Idea of legal provisions under Customs Act.*

Labour Law (HRD)

- *Develop conceptual understanding of Sources of Laws.*
- *Create awareness about The Constitution of India & its articles.*
- *Introduction of various labour laws.*
- *Provide idea of legal provisions under The Contract Labour (Regulation & Abolition) Act, 1970.*
- *Facilitate the knowledge about Determination of “Appropriate Govt.” under the Act, Registration of Establishment under The Contract Labour Act-1970.*
- *Enable students to understand legal provisions under Factories Act, 1948.*
- *Provide idea legal provisions of Maternity Benefit Act, 1961.*

- *Create awareness about Payment of Bonus Act, 1965.*
- *Make students aware about legal provisions Bombay Shops and Establishment Act, 1948. 10. Facilitate the knowledge about The Apprentices Act, 1961.*
- *Provide idea legal provisions of Minimum Wages Act, 1948.*
- *Make students aware about legal provisions under Payment of Wages Act, 1936.*
- *Create awareness about Equal Remuneration Act, 1976.*

**MAHATMA GANDHI ARTS, SCIENCE & LATE N. P. COMMERCE COLLEGE,
ARMORI, GADCHIROLI**

PROGRAMME OUTCOME – SCIENCE FACULTY

- Student develops the scientific temper.
- Student gains fundamentals of science.
- Student understands the inter-dependability of various sciences.
- Student learns to apply the knowledge on the day to day physical world.
- Student develops a potential to deal with elementary scientific problems with skill.
- Student becomes a part of the scientific drive for the betterment of humanity.

**MAHATMA GANDHI ARTS, SCIENCE & LATE N. P. COMMERCE COLLEGE,
ARMORI, GADCHIROLI**

DEPARTMENT OF ZOOLOGY

Programme Specific Outcome- UG

- *Apply the knowledge of various branches of Zoology for graduate course and higher studies.*
- *Develop positive attitude towards the subject for sustainable development.*
- *Understand the connection of life and rich diversity of organism and their ecological and evolutionary significance.*
- *Acquire basic skill and study of nature, techniques experimental skill and scientific investigation.*
- *Identify and list out common animals explain physiological changes in animal bodies.*
- *Explain genetic abnormalities animal benefits to human also diseases caused by animals to humans. Use of Bioinformatics, Biostatistics as a tool for all activities related to Zoology.*
- *Promotes responsibility, entrepreneurship skill research and career opportunities.*

Course Outcomes

BSc semester-I Paper- I

Life and Diversity of animals (Protozoa to Annelida)

- *Familiar with invertebrate world that surrounds us.*
- *Able to identify invertebrates and classify them up to the class level.*
- *Understand the basis of life processes in the non-chordates.*
- *Lower invertebrates introduction digestive nervous reproductive system.*
- *Classify and characterize phylum- protozoa, reproduction in Paramecium.*
- *Classify and characterize phylum- porifera, morphological characters of Sycon.*
- *Classify and characterize phylum- coelenterata, morphological characters of Obelia.*
- *CO-8 Classify and characterize phylum- platyhelminths, reproduction in Taenia solium.*
- *Classify and characterize phylum- aschelminths, reproduction in Ascaris.*
- *Classify and characterize phylum- Annelida, digestive reproduction in Hirudinaria.*

B.Sc. Semester-I Paper-II

Cell Biology

- *To know the fundamental principles and unifying facts of cell biology.*
- *To study the cell theory, prokaryotic and eukaryotic cells, animal and plants cell.*
- *To know the osmosis, diffusion, active and passive transport with help of examples.*
- *To study different models- Sandwich and fluid mosaic model.*
- *To study the cell organelles (Golgi complex, Ribosomes, lysosomes, Endoplasmic reticulum, Mitochondria etc.*
- *To know the structure and function of nucleus, nucleolus and chromosomes.*

BSc semester-II Paper- I

Life and Diversity of animals (Arthropoda to Hemichordata)

- *Familiar with invertebrate world that surrounds us.*
- *Able to identify invertebrates and classify them up to the class level.*
- *Understand the basis of life processes in the non-chordates.*
- *Lower invertebrates introduction digestive nervous reproductive system.*
- *Classify and characterize phylum-Arthropoda, reproduction in Periplaneta.*
- *Classify and characterize phylum- Mollusca, morphological characters of Pila.*
- *Classify and characterize phylum- Echinodermata, morphological characters of Asterias.*
- *Classify and characterize phylum-Hemichordata, reproduction in Balanoglossus.*

B.Sc. Semester-II Paper-II

Genetics and Evolution

- *To know the Mendelian genetics, laws of genetics, interaction of genes.*
- *To study linkage, crossingover, syndrome and mutation.*
- *To know the major history of life.*
- *To study the direct evidences of evolution (type of fossil, evolution of horse)*
- *To study the evolutionary changes, species concept, modes of speciation.*
- *To know more about macroevolution and extinction.*

BSc semester-III Paper- I

Animals Diversity of chordata and comparative anatomy

- *Familiar with vertebrate world that surrounds us.*
- *Able to identify vertebrates and classify them up to the class level.*
- *Understand the basis of life processes in the chordates.*
- *Higher vertebrates introduction digestive nervous reproductive system and comparative anatomy.*
- *Classify and characterize up to order -Urochordata, general characters Ascidian tadpole larva retrogressive metamorphosis.*
- *Classify and characterize up to order - Cephalochordata, morphological characters digestive system of Amphioxus.*
- *Classify and characterize up to order - Cyclostomata, morphological characters of Pteromyzon and Myxine.*
- *Classify and characterize up to order -pisces, general characters, osmoregulation.*
- *Classify and characterize up to order –amphibia, general characters, parental care.*
- *Classify and characterize up to order –Reptilia, general characters, snake venom poisonous and non poisonous snakes.*
- *Classify and characterize up to order –aves, general characters, flight adaptation migration. Classify and characterize up to order –mammals, general characters, prototheria, metatheria, eutheria.*

B.Sc. Semester-III Paper-II

Physiology and Biochemistry*Part-I

- *To know the fundamental principles and unifying facts of human physiology.*
- *To study the breathing mechanism, Hemoglobin (Hb %) as a respiratory pigments, function of respiratory organs and others respiratory organs.*

- *To study source and type of vitamins, deficiency and diseases.*
- *To know the digestive mechanism, digestion of carbohydrates, protein and fats.*
- *To study all digestive glands and its function (Structure and function of Salivary, Gastric, Intestinal, liver, Pancreas).*
- *To study of enzyme, nomenclature of enzyme, Induce–fit model and key-lock models, properties of enzyme and factors affecting enzyme activity.*
- *To study the mechanism of breathing, respiratory pigments, transports of O₂ and CO₂.*
- *To study the respiratory disorders and effects of smoking.*

BSc semester-IV Paper- I **Developmental Biology**

- *To Study of types of eggs.*
- *To know fertilization mechanism and significance.*
- *To study types of cleavage.*
- *To study types of blastulation.*
- *To study morphogenetic movements in the early development of frog.*
- *To know development of chick.*
- *To study extra embryonic membrane.*
- *To know gametogenesis.*
- *To study implantation types.*
- *To know placentation types and functions.*
- *To know gene activation and apoptosis.*
- *To study stem cells*
- *To know IVF*
- *To study semen bank and AI and contraceptive*

B.Sc. Semester-IV Paper-II **Physiology and Biochemistry*Part-II**

- *To study the structure and function of nephron, mechanism of urine formation.*
- *To know the elementary ideas of dialysis and counter current mechanism.*
- *To study the structure and functions of endocrine glands (Pituitary, Thyroid, Adrenal)*
- *To know the male and female sex hormones.*
- *To study their productive cycle (menstrual & estrous cycle)*
- *To study the structure and function of neuron, E.M. structure of neuron*
- *To know the sliding filaments theory of muscle*
- *To study the properties of muscles (Twitch, tetanus, tonus, summation, muscle fatigue)*
- *To study the circulatory system in details.*
- *To know the blood groups and its genetics.*
- *To know the Blood pressure, 13 clotting factors, cardiac cycle, ECG and function of blood and its composition etc.*

BSc semester-V Paper- I **Applied Zoology**

- *To study types of fisheries in brief.*
- *To know pre and post stocking management.*
- *To study mono and poly culture.*
- *To study fish diseases.*
- *To study life cycle of Ancylostoma and Wuchereria.*

- *To study biology control and damage insect pest.*
- *To study mosquito disease and Pediculus humanus.*
- *To study fowl on the basis of their use.*
- *To know about principles of poultry breeding and diseases.*
- *To study introduction of dairy farm and management.*
- *To know preservation semen and AI in cattle's and diseases.*
- *To study of management of modern dairy farm.*

B.Sc. Semester-V Paper-II

Aquatic Biology

- *To know the fundamental principles and unifying facts of aquatic biology.*
- *To study the ecosystems (Freshwater, marine water)*
- *To know the differences between lentic and lotic ecosystem*
- *To study different physicochemical and biological parameters of water & soil*
- *To know the fresh water and saline water fishery in India.*

BSc semester-VI Paper- I

Microtechnique Bioinformatics and Biostatistics.

- *To study visualization of cell by light microscope.*
- *To study concept of resolving power of different microscopes.*
- *To know the different fixation and staining technique for EM, freez-etch method.*
- *To study image processing method in microscopy.*
- *To study structure and function of microtome.*
- *To study fixation dehydration clearing embedding.*
- *To know about section cutting and problem encounter in section cutting.*
- *To study double staining with Haematoxylene. Eosin.*
- *To know about Bioinformatics tools.*
- *To study biological database.*
- *To study structure of nucleotide database.*
- *To know about Application of bioinformatics.*
- *To study of tabulation presentation of data sampling error.*
- *To study measures of central tendency dispersal probability distribution regression and correlation t- test analysis of variance.*

B.Sc. Semester-VI Paper-II

Reproductive Biology

- *To know the fundamental principles and unifying facts of reproductive biology.*
- *To know the structure and functions of main reproductive organs of human being.*
- *To study the current state of knowledge about the functional organization of the human body.*
- *To study the physiology of reproduction*
- *To know the role of male reproductive system and female reproductive system.*
- *To know the general functions of reproductive organs of male and female.*
- *To study the physiology of coitus, spermatogenesis and oogenesis.*
- *To know the assisted reproductive technology including ZIFT, GIFT, IVF, AI, etc.*
- *To study the contraceptive measures.*
- *To study the physiology of pregnancy.*

- To study the pregnancy test by using kit.
- To know the causes of infertility in male and female.
- To study the histology of reproductive organs of human being and other mammals too.

PROGRAMME SPECIFIC OUTCOMES (PSO) OF M.Sc. ZOOLOGY

Programme: M.Sc. Zoology

- Developing deeper understanding of key concepts of Zoology at biochemical, molecular and cellular level,
- Developing deeper understanding of key concepts of physiology and reproduction at organism level.
- Developing deeper understanding of key concepts of aquatic biology, fish and fisheries and parasitological.
- Strengthening of genetics and cytogenetic principle in light of advancements in understanding human genome and genomes of other model organisms.
- Description of expression of genome revealing multiple levels of regulation and strategies to manipulate the same in the benefit of the mankind.
- Development of an understanding of zoological science for its application in aquaculture, parasitological and fish and fishery sciences.
- Development of theoretical and practical knowledge in handling the animals and using them as model organism.
- Maintenance of high standards of learning in animal sciences

Course Outcomes

MSc Semester I

Paper- I Animal structure and function: Invertebrates

- Developing knowledge of animal classification into sub-kingdom section phyla and minor phyla.
- To know about Protozoa ultrastructure of locomotory organ.
- To know about Porifera cellular grade of organization in sponges.
- Developing knowledge of coelom formation evolution and significance.
- To know about origin of metazoan.
- Developing knowledge of coelentrata polymorphism, metagenesis and metamorphosis.
- To know about helminthes reproductive system structure and mechanism of reproduction in *Fasciola*, *Taenia* and *Ascaris*.
- To know about Annelida evolution of nephridia and mechanism of excretion in polycheta, oligochaeta and hirudinea.
- Developing knowledge of Onychophora *Peripatus* structure affinities and taxonomy position.
- To know about Arthropoda respiratory organ mechanism of gaseous exchange tracheal respiration in insect and gill respiration in crustacean.
- Mollusca neuroanatomy in gastropoda *Pila* *Unio* *Loligo*.
- To know about Echinodermata water vascular system structure and function.

- *To know about Echinodermata larval form metamorphosis and evolutionary significance.*
- *To know about Ctenophora general account and affinities.*
- *To know about Entoprocta ectoprocta general account and affinities.*

MSc Semester I

Paper- II – General Physiology

- *Description of enzymes, mechanism of enzyme action, activators and inhibitors.*
- *Understanding the concepts of respiratory pigments, neurotransmitter, colour change mechanism.*
- *Understanding the physiology of digestion of protein, carbohydrates and fats.*
- *Regulation of heart-beat and blood pressure, neural and chemical regulation of respiration, Gas transfer in air and water.*
- *Perception of circulatory and respiratory responses to extreme conditions.*
- *Discerning acid –base balance, Regulation of body pH.*
- *Developing the concept of animal adaptation by exploring the diversity of functional characteristics of various kinds of organisms which is closely related to evolutionary processes and environmental changes.*
- *Perception of Osmoregulation, Kidney functions and diversity, Extra-renal osmoregulatory organs, Patterns of nitrogen excretion.*
- *Concept of thermoregulation - Heat balance in animals, Adaptations to temperature extremes, torpor, Aestivation and hibernation, Counter current heat exchangers.*
- *Understanding of adaptations to Stress- basic concept of environmental stress, acclimatization, avoidance and tolerance, stress and hormones.*
- *Description of sensing the environment- photoreception, chemoreception, mechanoreception, echolocation, endogenous and exogenous biological rhythms, chromatophores and bioluminescence.*
- *Understanding of feeding mechanisms and their control, effect of starvation.*

MSc Semester I

Paper-III

Course – Cell biology and genetics

- *Understanding of cell membranes (structure and Function) active transport passive transport, osmosis, diffusion, plasma membrane models (fluid mosaic models)*
- *Description of cell organelles (ribosome, mitochondria, golgi complex, lysosome, endoplasmic reticulum etc.)*
- *Understanding of cell signalling, cellular communication, signal transduction and general principle of cell communications.*
- *Understanding of cancer-genetic rearrangements in progressive cell, oncogenes tumor suppressor genes & metastasis.*
- *Understanding of Mendel's principle, its extension and chromosomal basis.*

- *Determination of gene action from genotype to phenotype including penetrance and expressivity, gene interaction, epistasis, pleiotropy; nature of the gene and its functions.*
- *Evolution of the concept of the gene and fine structure of gene using rII locus.*
- *Capability to perform gene mapping using 3- point test cross in Drosophila, gene mapping in humans by linkage analysis in pedigrees.*
- *Imparting knowledge regarding gene mutation, types of gene mutations, methods for detection of induced mutations, P- element insertional mutagenesis in Drosophila, DNA damage and repair.*
- *Developing concept of regulation of gene activity in prokaryotes and eukaryotes at transcriptional and posttranscriptional level.*
- *Describing structural and functional organization of a typical eukaryotic gene, transcription factors, enhancers and silencers, and non-coding genes.*
- *Depicting the mechanism of sex determination and dosage compensation in human and other model organisms.*
- *Developing skills in human genetics with capability for karyotyping and nomenclature of metaphase chromosome bands.*
- *Understanding the chromosome anomalies and associated diseases.*
- *Capability to perform basic genetic analysis of complex traits - complex pattern of inheritance, quantitative traits, threshold traits.*
- *Description of human genome and mapping.*
- *Identify link between genetics and cancer with emphasis on oncogenes, chromosome rearrangement and cancer, tumor suppressor genes and genetic pathways to cancer.*
- *Principles of Gene Manipulation*
- *Imparting knowledge of basic recombinant DNA techniques, preparation of restriction maps and mapping techniques.*
- *Understanding of method and applications of nucleic acid probes, blotting techniques, DNA fingerprinting, DNA foot printing, methyl interference assay and polymerase chain reaction.*
- *Developing skill to understand biology of cloning and expression vectors.*
- *Description of gene cloning strategies by transformation of E. coli and other cells with rDNA; methods of selection and screening of transformed cells; construction of genomic and cDNA libraries.*
- *Defining key strategies to express cloned genes including phage display.*
- *Exposure to principles of DNA sequencing, automated sequencing methods; synthesis of oligonucleotides, primer design.*

- *Micro-arrays and confocal microscopy techniques with application.*
- *Understanding a concept of changing genes- directedevolution, protein engineering in microbes.*
- *Introduction to gene manipulation methods in animals, transgenic technology, application of recombinant DNA technology; gene knockouts, gene silencing, mouse disease models, somatic and germ- line therapy.*

MSc Semester I

Paper- IV- Reproductive biology

- *Developing knowledge of various methods of asexual and sexual reproduction in Protozoa.*
- *To know about regeneration in Hydra and annelid worm morphogenesis and hormonal control.*
- *To know about metamorphosis in insect.*
- *To know about mechanism of vitellogenesis.*
- *Developing deeper knowledge of spermatogenesis process hormonal regulation.*
- *Developing deeper knowledge of oogenesis process biochemical event hormonal regulation.*
- *Developing deeper knowledge of cytological and molecular events of fertilizations.*
- *Developing deeper knowledge of types of cleavage blastulation gastrulation and embryonic induction.*
- *To know about male accessory sex glands in mammals.*
- *To know about semen biochemical composition and sperm abnormality.*
- *To know about sperm capacitation and decapacitation .*
- *Developing deeper knowledge of pheromones and sexual behavior in mammals.*
- *Developing deeper knowledge of neurohormonal control of fish reproduction.*
- *To know about molecular induction and organizer concept.*
- *To know about cryopreservation of gametes, embryo and test tube baby.*
- *To know about in vitro fertilization IVF and significance.*

MSc Semester II

Paper- I- Animal structure and function: Vertebrates

- *To know about origin and ancestry of chordate.*
- *To know about general organization and affinities of cephalochordate.*
- *To know about structure development and metamorphosis of amoecoetus.*
- *To know about general characters and affinities of dipnoi.*
- *To know about organ and mechanism of respiration in pisces and amphibian.*
- *To know about vertebrate integument and its derivatives.*
- *Developing deeper knowledge of appendicular skeleton in amphibian reptelia aves and mammals.*
- *To know about general body organization and classification in chelonian.*

- *Developing deeper knowledge of evolution of urinogenital organ in vertebrates.*
- *To know about origin of birds.*
- *Developing deeper knowledge of cetacea general characters and adaptations.*
- *To know about comparative anatomy of brain in vertebrates.*
- *To know about autonomous nervous system in vertebrates.*
- *To know about evolution of heart in vertebrates.*
- *To know about sense organ in vertebrates.*
- *Developing deeper knowledge of evolution of man.*

MSc Semester II

Paper- II

Course – General and Comparative Endocrine Physiology

- *Developing a concept of endocrine system, its function and phylogeny.*
- *Description of evolution and comparative aspects of endocrine physiology in vertebrates.*
- *An overview of synthesis of corticosteroid, structural diversity of glucocorticoids among vertebrates.*
- *Importance of adrenocortical and adrenomedullary interaction.*
- *Illustration of evolution of thyroid gland, thyroid hormone synthesis and its regulation, hormonal regulation of calcium and phosphate homeostasis.*
- *Conceptualization of hormonal control of feeding behaviour and gastrointestinal tract functioning, Pancreatic hormones and glucose homeostasis, vitellogenesis and the evolution of viviparity.*

MSc Semester II

Paper- III - Molecular Biology and Biotechnology

- *Description of organelle genome, DNA structure and forms of DNA and DNA replication*
- *Understanding transcription in prokaryotic and eukaryotic*
- *Description of RNA polymerase enzyme, transcriptional unit, initiation, elongation and termination.*
- *A study of translation (prokaryotic and eukaryotic) genetic code and mobile DNA elements.*
- *Description of Antisense and ribosome technology.*
- *An overview of isolation and sequencing of DNA, gene amplification, Polymerase chain reaction, RAPD, RFLP, maxam and gilberts, Sangers dideoxy methods.*
- *Detailed view of splicing and cloning vectors, hybridization techniques, southern and northern blotting hybridization and microassay*
- *Understanding the Medical biotechnology, application of RFLP, genetic counseling.*
- *Description of agriculture biotechnology, biofertilizers, bioinsecticides, biogass.*
- *Detailed understanding of Immunobiotechnology, hybridoma technology and monoclonal antibodies.*
- *Description of industrial and environmental biotechnology.*

MSc Semester II

Paper- IV - *Advanced developmental Biology*

- *Information about history and basic concepts of developmental biology.*
- *Illustration of model systems: invertebrate and vertebrate model organisms.*
- *Identification of developmental genes: spontaneous and induced mutation, mutant screening, developmental mutations in Drosophila.*
- *Elucidation of early embryonic development of invertebrates and vertebrates.*
- *Concept of axis specification in Drosophila, role of maternal genes, patterning of early embryo by zygotic genes and the homeotic selector genes.*
- *Concepts of organogenesis in invertebrates and vertebrates: the homeotic selector genes for segmental identity, insect compound eye, kidney development– development of ureteric bud and mesenchymal tubules.*
- *Illustration of postembryonic development: growth- cell proliferation, growth hormones; aging genes involved in alteration in timing of senescence.*
- *Understanding of process of regeneration in Hydra and salamander.*
- *Explanation of embryonic stem cells and their applications.*
- *Description of medical implications of developmental biology, genetic errors of human development, the nature of human syndromes*
- *Study of gene expression and human disease– inborn errors of nuclear RNA processing, inborn errors of translation*
- *An insight on teratogenesis- environmental assaults on human development, teratogenic agents like alcohol, retinoic acid etc.*

MSc Semester III

Paper- I- *Parasitology and Immunology*

- *Developing deeper knowledge of Vibrio cholera and Clostridium titani life cycle and mode of transmission, infection.*
- *Developing deeper knowledge of Yersinia pestis life cycle and mode of transmission, infection.*
- *Developing deeper knowledge of Influenza and H1N1 virus life cycle and mode of transmission, infection.*
- *Developing deeper knowledge of Dengue and hepatitis life cycle and mode of transmission, infection.*
- *Developing deeper knowledge of Trypanosoma and Entamoeba life cycle and mode of transmission, infection.*
- *Developing deeper knowledge of Leishmania and Malaria life cycle and mode of transmission, infection.*
- *Developing deeper knowledge of Wucheria and Trichinella life cycle and mode of transmission, infection.*
- *To know about toxin and antitoxins.*
- *To know about immune system innate and adaptive immunity.*
- *To know about cell and organ of immune system T- cell and B-cell.*
- *To know about major histocompatibility complex MHC.*
- *To know about complement system.*

- *To know about cytokine receptor.*
- *Developing deeper knowledge of hypersensitivity reaction.*
- *Developing deeper knowledge of transplantation immunology.*
- *Developing deeper knowledge of tumor immunology*

MSc Semester III

Paper- II (Special group- Aquaculture-I)

Course – Fresh water aquaculture

- *Knowing about the aquaculture, importance and its present status in India.*
- *Learning physicochemical conditions of pond water.*
- *Biological conditions, plankton seasonal distribution and its role in fisheries.*
- *Chemical conditions of pond soil, pond ecosystem.*
- *To study of methods of productivity measurement, planning and construction of fresh water fish farm.*
- *Learning of biology of culturable indigenous carps and exotic carps.*
- *Knowing the reproductive system and breeding behavior in Indian carps, fisheries of major river systems in India.*
- *Learning of riverine collection of fish seed, fish breeding in wet and dry bundhs.*
- *Learning about the induced breeding by hypophysation, hatching techniques and type of hatcheries.*

MSc Semester III

Paper- III (Special group- Aquaculture-II)

Course – Aquaculture and rural development

- *Learning culture of zooplankton, crabs, pearl, oyster, prawn and methods of breeding.*
- *Knowing development and advancement of aquaculture in India.*
- *Learning about the larvivorous fishes in relation to public health.*
- *To study of culture of exotic and transplanted fishes, breeding and care of fresh water aquarium fishes.*
- *Developing knowledge about fishery extension techniques.*
- *Learning on aquaculture and rural development in India, role of FFDA in India.*
- *Learning about the socio-economic status of fisherman community, fisheries co-operatives and their role in fish production and marketing*
- *To know about the fishery legislation and their role in fishery development.*
- *Learning of riverine collection of fish seed, fish breeding in wet and dry bundhs.*
- *Learning about the induced breeding by hypophysation, hatching techniques and type of hatcheries.*

MSc Semester III

Paper- IV - Foundation I -Fresh water fisheries

- *Developing deeper knowledge of riverine fisheries.*
- *Developing deeper knowledge of lacustrine reservoir fisheries.*
- *To know about physico-chemical characters of fresh water.*
- *To know about construction and layout of fish farm.*
- *To know about history of fish culture in India.*
- *To know about outline of commercially important species of fresh water fishes and prawn.*
- *To know about present status scope and importance of fisheries.*
- *To know about fisheries product and by- product.*
- *To know about induced breeding.*
- *To know about bundh breeding (dry and wet).*
- *To know about fish seed production by Chinese circular hatchery.*
- *To know about transportation of brood and fish seed.*
- *Developing deeper knowledge of food and feeding habits of commercially important fishes.*
- *To know about nutritional requirement of fish.*
- *To know about artificial feed and their composition.*
- *Developing deeper knowledge of crafts and gears used in fresh water fish capture.*

MSc Semester IV

Paper- I- Biotechniques, Biostatitics, Ethology, Toxicity and Bioinformatics

- *Developing deeper knowledge of sterilization techniques media for microbial culture, inoculation methods.*
- *To know about animal cell and tissue culture primary, cell line cell quantification growth kinetics of cell cryopreservation of cell.*
- *To know about basic principle of sedimentation and centrifugation radioactive isotopes.*
- *To know about chromatographic separation – thin layer and gas chromatography electrophoretic separation techniques.*
- *To know about central tendency and dispersion.*
- *To know about probability basic theory and types of probability.*
- *To know about sampling types standard error standard deviations significances test t-tes z-test chi square test.*
- *To know about neuronal control genetic and environmental component in development of animal behavior, animal ethics.*
- *Developing deeper knowledge of introduction and scope of toxicology.*
- *To know about environmental toxicology.*
- *To know about translocation of toxicants.*
- *To know about toxicity test.*
- *Developing deeper knowledge of introduction and scope of bioinformatics.*
- *To know about sequence alignment.*
- *To know about biological database BLAST and FASTA.*
- *To know about phylogenetic analysis.*

MSc Semester IV

Paper- II - Foundation II, applied fresh water fisheries

- *To know about pre and post stocking management of pond.*
- *To know about predators and their eradication.*
- *To know about aquatic weeds and their control.*
- *To know about manuring and liming of pond.*
- *To know about composite fish farming.*
- *To know about general outline of integrated fish farming.*
- *To know about sewage fed fisheries.*
- *To know about prawn culture.*
- *To know about role of cooperative societies in fish marketing.*
- *To know about introduction to fisheries economics.*
- *To know about economics of fish seed and fish production.*
- *To know about fisheries extension services.*
- *To know about fresh water pearl culture.*
- *To know about cage and pen culture.*
- *To know about setting up of aquarium and its maintenance.*
- *Developing deeper knowledge of general outline of fish diseases.*

MSc Semester IV

Paper-III (Special group- Aquaculture-III)

Course – Aquaculture and Management

- Learning aquaculture technology for fresh and marine fishes.
- Culturing of fish food organisms like algae; zooplankton for improving nutritive quality.
- Management of water quality requirements for aquaculture.
- Learning integrated farming by fish-cum-live stock farming, paddy-cum-fish farming, and aquaculture engineering-aquahouse.
- A detailed learning of transportation of finfish and shellfish, eggs, fry, fingerlings and adults.
- Managing improvement in the Nutrition of aquatic animals by learning feed types, manufacture and ingredients, anti- nutritional factors in fish feed ingredients.
- Understanding environmental impact of aquaculture, aquacultural wastes and future developments in waste minimization, environmental consequences of hypernutrition.
- Learning about fish vaccines- strategy and use in aquaculture.

MSc Semester IV

Course – Fish pathology and fish genetics

- *Understanding biochemical composition of raw fish.*
- *Learning about nutritional value of raw and preserved fish.*
- *Understanding fish preservation objective and principles.*

- *To know the methods of fish preservation.*
- *Details learning about the fish decomposition, rigor mortis and fish spoilage.*
- *Understanding effect of water pollution on fishes.*
- *Learning details on poisoning, toxicity and allergies from fish as a food.*
- *To study on fish products and byproducts.*
- *Understanding fungal, bacterial, protozoan diseases of farm fish.*
- *Learning of nutritional diseases of fish.*
- *Knowing the worm and crustacean diseases of farm fish.*
- *Learning about the diseases caused by aquatic pollutants.*
- *To study about hybridization, transgenic fish, cryopreservation of gametes, gene banking and its application of genetic engineering in aquaculture.*
- *Learning about fish genetic resources and its application in fisheries management.*
- *Student can select any two papers from optional special groups and two papers are compulsory. Besides this, each student completes a Dissertation, which is theoretical and does not involve any laboratory component.*

**MAHATMA GANDHI ARTS, SCIENCE & LATE N. P. COMMERCE COLLEGE,
ARMORI, GADCHIROLI
DEPARTMENT OF CHEMISTRY**

Programme Specific Outcome- UG

- Understand the fundamentals principle, instrumentation, application of various *spectroscopic techniques like NMR, IR, and U.V- Visible spectroscopy.*
- *Know Organic Synthesis and reaction mechanisms via several organic chemical reactions.*
- *Study green route for chemical reaction for sustainable Development.*
- *Achieve pure and applied knowledge of physical chemistry through principle, observation , hypothesis derive conclusion and evaluate their significance with broad scientific context*
- *Understand the synthesis and significance of polymer and fabrics in everyday life.*
- *Know appropriate techniques for the qualitative and quantitative analysis of*
- *Chemicals in laboratories and in industries.*
- *Aware different branches and importance of chemistry like analytical, organic, inorganic, physical, environmental, polymer and biochemistry, medicinal chemistry for research and as better carrier opportunity.*
- *Know different basic standards of soil parameter having advantages and disadvantages Chemical fertilizer in actual practices.*
- *Attentive about sources of water pollution and industrial waste management.*
- *Demonstrate good laboratory practices and safety to develop research oriented skills.*
- *Promotes towards use modern techniques, decent equipment's and Chemistry software's*

Course Outcomes

**BSc semester-I Paper- I
Inorganic Chemistry**

- *To know fundamental and shapes s, p and d atomic orbital and electronic configuration of elements.*
- *To learn Atomic Structure by theory like Bohr's, de-Broglie, Heisenberg's and Schrodinger wave equation.*
- *To study periodic table through Periodic trends and Properties θ Understand the formation of Covalent Bond by Valance bond theory.*
- *Explore the concept of Molecular Orbital theory using bonding and antibonding molecular orbitals.*
- *To make them know how elements are classified into S and P blocks, and Comparison of periodic property of elements.*
- *Know the effect of hydrogen bonding on viscosity, solubility, Melting point and boiling point.*
- *Understand the concept of Volumetric Analysis by various titrations.*

**BSc semester-I Paper- II
Organic Chemistry**

- *To know Fundamentals of Organic Chemistry in terms of Electromeric Effect, Resonance and Hyper conjugation.*
- *To study types hybridization, shape and reactivity of organic molecules.*
- *To have a basic understanding of classification and nomenclature of organic compounds,*
- *Understand basics of organic reaction mechanism, aromaticity and stereochemistry of molecule. Learn the types of hydrocarbons its chemical properties and its uses.*
- *To explore synthesis and chemical properties of aromatic hydrocarbons via various organic name reaction.*

BSc semester-II Paper- I **Organic Chemistry**

- *To study in detail about mechanism of Nucleophilic Substitution (SN1 , SN2 and SNi) reactions.*
- *To understand the methods of preparation of aryl halide and there reactivity.*
- *Learn chemical properties and different approaches to obtained Alcohols, Phenols and Ethers and there uses.*
- *To know Nomenclature, Structure and reactivity of the carbonyl group through organic name reaction and mechanism.*
- *To explore the synthesis structure and bonding, physical properties: acidity of carboxylic acid and there derivatives.*
- *To gain fundamental knowledge to distinguish between different functional group.*

BSc semester-II Paper- II **Physical Chemistry**

- *To know the Mathematical Concepts: Logarithmic relations, linear graphs, calculation of slopes.*
- *To understand Strong, moderate and weak electrolytes, degree of ionization.*
- *Learn the concept of Statements of first law of thermodynamics and thermochemistry.*
- *To acquired knowledge of postulates of kinetic theory of gases and distinguish between ideal and real gases.*

BSc semester-III Paper- I **Inorganic Chemistry**

- *To study in depth about the structure and bonding in diborane and borazine.*
- *To learn the chemistry of first second and third transition series element θ Understand the chemistry of lanthanides and actinides*
- *To know the basic properties and understanding of iodine and interhalogen compounds*
- *Learn about general characteristic of Ionic and metallic solid.*
- *To know the general characteristic of Lewis, Bronsted Lowery, and Lux –Flood concept of acid and bases.*

BSc semester-III Paper- II **Physical Chemistry**

- *To understood the phase rule, degree of freedom, derivation of clapeyron equation and its application.*
- *To make them able to describe the liquid –liquid mixture, partial miscible liquids and immiscible liquids.*
- *To learn the second law of thermodynamics.*
- *Know the concept of partial molar quantities, chemical potential.*
- *Learn about concept of collision theory of bimolecular reaction*
- *To know depth of solution and colligative properties.*
- *Understand the concept of reaction rate, factor affecting the rate of reaction- concentration, temperature, etc.*

BSc semester-IV Paper- I **Inorganic Chemistry**

- To study Effective Atomic Number Theory and Werner Complexes
- Understand the magnetic properties and the colour of coordination compounds.
- To know the stability of metal complexes by the using formation constants and calculate thermodynamic parameters from them.
- Learn to explain Parsons SHAB concept and familiar with its application
- To understand the rules for splitting of *d*-orbital in octahedral, tetrahedral and square planar complexes.
- To study in depth about principle, instrumentation of colorimetry and Spectrophotometer.

BSc semester-IV Paper- II

Organic Chemistry

- To learn the preparation and properties of nitro and amino compounds.
- Make them understood the concept diazonium salt and their stability.
- To introduce about Organometallic and heterocyclic compounds
- To know quantitative analysis of different element.
- To introduce the concept of preparation and classification of amino acid.
- To know details about classification and chemical properties of carbohydrate.
- To learn the preparation and properties of synthetic dyes.
- Make them aware with some fundamental classes of synthetic drugs

BSc semester-V Paper- I

Organic Chemistry

- To know about spectroscopic technique Nuclear Magnetic resonance (NMR).
- To Recognize Problems elucidation of simple organic compounds using NMR data.
- Learn Claisen condensation reaction mechanisms through via Enolates of Active methylene compounds.
- To study the chemistry comprising synthesis of ketone, diketone, 4-methyl uracil from acetoacetic ester.
- Know the concept keto-enol tautomerism.
- Understand introduction classification and reaction of polymers and fabrics.
- To explore about Biodegradable and conducting polymers.
- Understand twelve principles of green chemistry Green Chemistry as technology for sustainable development and Designing Products.

BSc semester-V Paper- II

Physical Chemistry

- To study in depth about electrochemical reaction, Electrical transport and conductivity of electrodes.
- To understand the application of various electro chemical theory like Kohlrausch law, Arrhenius theory, Debye-Huckel theory and Onsagar equation.
- To explore difference between Faraday's I and Faraday's II laws of electrolysis.
- Aware about thermodynamic quantities of cell reactions such as ΔG , ΔH & ΔS & equilibrium constant.
- To learn entire concept of reversible electrodes like gas electrode, metal-metal ion electrode, amalgam electrode, metal insoluble salt-anion, redox electrodes.
- To study the derivation Nernst equation and Applications of emf measurements in pH-determination and potentiometric titration.
- To know the Failure of classical mechanics and need of quantum mechanics
- To understand the concept of Normalized and orthogonal wave functions.

- To differentiate between classical and quantum mechanics.
- To Understand the Postulates of quantum mechanics, by application in Derivation of Schrodinger wave equation

BSc semester-VI Paper- I

Inorganic Chemistry

- To carry out Qualitative and quantitative analysis of Experimental data by sampling, errors, accuracy and Precision.
- To know modern instrument Flame Photometry and study Basic principles, instrumentation and application of it.
- To develop basic skills required for chromatography, ion exchange, solvent extraction, crystallisation, distillation, TLC and column.
- To Understand the Basic Principal of Soil Chemistry through Collection of sample, Chemical Analysis, Soil pH and Soil Salinity.
- To explore the basic knowledge of various pesticides, insecticides, fungicides and herbicides.
- To make them know about Preparation, properties and application o organometallic Compound like Al, Hg and Sn.
- To aware about gold and silver Nanomaterial Technology and Carbon Nanotube.

BSc semester-VI Paper- II

Physical Chemistry

- To know about photochemical reaction through various laws and fluorescence, phosphorescence, chemiluminesence.
- Learn how to determine dipole moment, Bond moments Group moments for benzene derivatives
- To Know derivation of expression for rotational and vibrational spectra and there application for molecule.
- Learn to distinguish phenomenon of adsorption and absorption and colloidal chemistry through ultrafiltration, electrophoresis and electro Osmosis.
- To understand through classification of particle,
- To study Nuclear Chemistry and its application in radio tracers, Discovery of radioactivity, typical radioisotopes.

MSc. CHEMISTRY. After successful completion of two years degree program in chemistry student should be able to:

- | | |
|---|--|
| Programme Specific Outcomes (PSOs):- | <ol style="list-style-type: none">1. Know different approaches for Organic Synthesis and study there reaction mechanisms.2. Motivate towards critical thinking and analysis to solve complex chemical problems, e.g., analysis of data, synthetic logic, spectroscopy, structure and modelling, problem solving.3. Promotes towards use modern techniques, decent equipment's and Chemistry software's.4. Demonstrate good laboratory practices and safety to impart the basic analytical and research oriented skills.5. Understand the fundamentals principle, instrumentation and application of various spectroscopic techniques like NMR, IR, and U.V- Visible spectroscopy.6. Learn potential uses of analytical, industrial, medicinal and green chemistry for sustainable development of human welfare.7. Achieve all essential knowledge of organic, inorganic physical, analytical chemistry.8. Aware about various separation techniques like Chromatography Ion exchange, Solvent extraction.9. Understand the concept of synthesis and significance of medicine, polymer and fabrics in everyday life.10. Perform experiments in the area of organic synthesis, qualitative and quantitative analysis, estimation, inorganic semi micro analysis, and conductometric potentiometric methods. |

-

Course outcomes of MSc Semester: -I

Course	After completion of these course students should be able to :-
<p>Paper-I Inorganic Chemistry (COs)</p>	<ul style="list-style-type: none"> ❑ To know Stereochemistry and Bonding in Main Group Compound by VSRPR theory. ❑ To understand Metal-Ligand Bonding via Crystal Field Theory. ❑ Learn to determine Stepwise and overall formation constants using spectrophotometric and Potentiometric method. ❑ To study Classification, nomenclature, structure, bonding of borane hydride cluster. ❑ Understand the concept of Metal-Metal bonds
<p>Paper-II Organic Chemistry (COs)</p>	<ul style="list-style-type: none"> ❑ To know Nature and Bonding in Organic Molecule. ❑ Learn novel organic synthesis approaches of enamines and imines. ❑ Understand concept of Stereochemistry in 5 -8 membered rings. ❑ To explore the concept of Reactive Intermediates: carbocation, carbanion, free radical, carbenes, nitrenes. ❑ To make understood about organic Reaction mechanism, there Structure and Reactivity. ❑ To study in detail about aliphatic, aromatic nucleophilic and electrophilic substitution.
<p>Paper-III Physical Chemistry (COs)</p>	<ul style="list-style-type: none"> ❑ To know Nature and Bonding in Organic Molecule. ❑ To understand postulates of quantum mechanics and derivation of Schrodinger wave equation. ❑ Learn about Classical thermodynamics Maxwell's relations and entropy Partial molar quantities. ❑ To understand the construction of phase diagram in one, two, and three component systems. ❑ To study chemical kinetics considering various theories

	<p>related to rates of reaction.</p> <ul style="list-style-type: none"> ❑ To know Photochemical and enzyme catalysis reaction and there application.
<p>Paper-IV Analytical Chemistry (Cos)</p>	<ul style="list-style-type: none"> ❑ To know application of analytical chemistry in qualitative and quantitative analysis of data. ❑ To understand various separation technique like Chromatography Ion exchange, Solvent extraction. ❑ To make them aware about Classical methods of analysis via volumetric and gravimetric analysis. ❑ To learn the principle, instrumentation of Spectrophotometry and Colorimetry.

Course outcomes of MSc Semester: -II

Course	After completion of these course students should be able to :-
<p>Paper-I Inorganic Chemistry (Cos)</p>	<ul style="list-style-type: none"> ❑ To Study Electronic spectra of Transition Metal complexes. ❑ To understand the concept of Magnetic Properties of Transition Metal complexes. ❑ Learn Reaction mechanism of Transition Metal Complexes. ❑ To know Structure and bonding, vibrational spectra of metal carbonyls and Metal nitrosyls. ❑ To explore EAN rule, synthesis and structures Wilkinson's catalyst and Vaska's compound.
<p>Paper-II Organic Chemistry (COs)</p>	<ul style="list-style-type: none"> ❑ To know the addition to carbon-carbon and carbon-hetero atom multiple bond reaction and mechanism. ❑ Understand the mechanism of molecular rearrangement through organic name reaction. ❑ Learn the concept of synthesis reactivity and mechanism of free radical reaction. ❑ To Aware the knowledge of Basic principles of green chemistry for sustainable development.

Paper-III Physical Chemistry (COs)	<ul style="list-style-type: none"> ❑ To know application of quantum mechanics. ❑ To learn all concept of thermodynamics like Statistical and Irreversible Thermodynamics. ❑ To understand Solid State chemistry and its Reactions. ❑ To explore knowledge of nuclear chemistry and its models.
Paper-IV Analytical Chemistry (Cos)	<ul style="list-style-type: none"> ❑ To learn fundamental of sampling and quantification. ❑ To know application and advantages of gas and Liquid chromatography. ❑ To understand modern technique like Fluorometry, phosphorimetry and Flame photometry. ❑ To introduce about Principle of polarography. Its Instrumentation and advantages.

Course outcomes of MSc Semester: -III

(ORGANIC CHEMISTRY SPECIALIZATION)

Course	After completion of these course students should be able to :-
Paper-I Spectroscopy (Cos)	<ul style="list-style-type: none"> ❑ To understand modern technique like Fluorometry, phosphorimetry and Flame photometry. ❑ To understand Symmetry properties of molecules and application. ❑ To know working and uses of modern technique like Mass and Mossbauer spectroscopy. ❑ To study fundamentals of microwave and Infrared spectroscopy. ❑ Understand the principle of ESR and Raman for molecular structure determination.

Paper-II Organic Chemistry (Special-I) (Cos)	<ul style="list-style-type: none"> ❑ To understand synthesis and mechanism of photochemical reaction. ❑ To know concept of Pericyclic Reactions by FMO and Woodward-Hoffman approach. ❑ To learn oxidation and reduction reagent there stereochemistry in organic synthesis. ❑ To make them aware about Chemistry of P, S, Si, B, and Ti compounds.
Paper-III Organic Chemistry (Special-II) (Cos)	<ul style="list-style-type: none"> ❑ To understand occurrence, isolation Structure determination of natural products, alkaloids plant pigments. ❑ To get detail knowledge of naturally occurring sugars carbohydrate. ❑ Learn concepts of Amino acids, protein and peptides. ❑ To know structure of and importance of Porphyrin, steroids.
Paper-IV Polymer Chemistry (Elective) (Cos)	<ul style="list-style-type: none"> ❑ To study nomenclature and classification of polymers ❑ Understand how to determine of Molecular mass of polymers. ❑ Know Morphology and order in crystalline polymers. ❑ To awake about types of Commercial polymers and uses
Course outcomes of MSc Semester: -IV	
Course	After completion of these course students should be able to :-
Paper-I Spectroscopy (Cos)	<ul style="list-style-type: none"> ❑ Understand the fundamental of Ultraviolet and visible Photoelectron spectroscopy. ❑ To learn how to perform analysis Nuclear magnetic Resonance data. ❑ To make known about types of NMR and its various applications in medical field. ❑ Understand the modern X ray, Electron, Neutron Diffraction.

<p>Paper-II Organic Chemistry (Special-I) (Cos)</p>	<ul style="list-style-type: none"> ❑ To study mechanism organic name reaction involving Carbanion intermediate. ❑ To know Preparation and applications of organometallic reagents. ❑ Understand the concept of Advanced Stereochemistry in organic synthesis. ❑ Learn the protection and deprotection of functional groups. ❑ To make them know design and synthesis based on retrosynthetic analysis. Mechanism of Enzyme Action
<p>Paper-III Organic Chemistry (Special-II) (Cos)</p>	<ul style="list-style-type: none"> ❑ Understand mechanism of reaction in which enzyme acts as biological catalyst. ❑ To know synthesis of heterocycle and chemical properties. ❑ Learn biological functions of Nucleic Acids, lipids, vitamins. ❑ To know Introduction, classification and methods of dyeing. ❑ To make them know History, medical terms in pharmaceutical chemistry and classification of drugs.
<p>Paper-IV Polymer Chemistry (Elective) (Cos)</p>	<ul style="list-style-type: none"> ❑ To know Introduction, classification and methods of dyeing. ❑ To make them know History, medical terms in pharmaceutical chemistry and classification of drugs. ❑ Understand concept of Characterization of polymers by thermo mechanical and X-ray diffraction technique. ❑ To make them distinguish between Biomedical Inorganic, coordination polymers.

**MAHATMA GANDHI ARTS, SCIENCE & LATE N. P. COMMERCE COLLEGE,
ARMORI, GADCHIROLI**

DEPARTMENT OF BOTANY

Programme Specific Outcome- UG

- *Know about the importance of plants, their diversity and its conservation.*
- *Know the cryptogams and phanerogams.*
- *Know the Characteristic features, Systematics, Morphology, Structure and lifecycle of Viruses, Bacteria, Cyanobacteria, Mycoplasma, Algae, Fungi, Lichen, Bryophytes, Pteridophytes.*
- *Know the Diversity, Systematics and biology of seed plants (Angiosperms and Gymnosperms).*
- *Know the structures, types and function of gene, genome, cell, tissue, organ system containing development, reproduction, ecological and physiological adaptations.*
- *Understand the basic concepts of plant Physiology, Biochemistry, Anatomy, Morphology, Taxonomy, Ecology, Cytology, Genetics, Plant pathology, Mycology, Ethenobotany.*

Course Outcomes

BSc semester-I Paper- I

Micro-organisms, Algae, Fungi and Plant Pathology

- *Understand the general characteristic of life.*
- *Understand the depth about Viruses Bacteria & Mycoplasma.*
- *Understand the depth of Cyanobacteria (Nostoc).*
- *Learn about general characteristics, classification, economic importance of Algae & Fungi.*
- *Understand the life history of Algae (Voucheria, Chara, Bactrachopermum, Ectocarpus, Oedogonium) and Fungi (Mucor, Albugo, Cercospora, Puccinia, Penicillium).*
- *Understand the classification of plant diseases, pathogen, symptoms, causes and control measures of Tobacco mosaic disease, Red rot of Sugarcane, Brown spot of Rice, Bacterial Blight of Cotton & loose smut of Wheat.*

BSc semester-I Paper- II

Plant Diversity (Bryophyta, Pteridophyta, Gymnosperms and Palaeobotany)

- *Understand the morphological diversity and Economic importance of Bryophyta.*
- *Know about Classification system, the interesting characters and Economic importance of Pteridophyta and Gymnosperms.*
- *The students will be able to understand the structure & reproduction of certain selected Bryophyta, Pteridophyta, Gymnosperms.*
- *The students will be able to understand the process of Fossilization.*
- *Learn some fossil Rhynia, Glossopteris, Cycadeoidea.*

BSc semester-II Paper- I **Angiosperm (Morphology and Anatomy)**

- *Understand the morphological characteristic of Angiosperm.*
- *Know about modification of stem, leaves, root in Angiosperm.*
- *Know about phyllotaxy, branching, pattern and venation in Angiosperm.*
- *Understand about morphology of flower, its types, floral whorls (calyx, corolla, androecium & gynoecium) useful for practical purpose also.*
- *Understand about Inflorescence, its types, placentation, Aestivation, types of fruits, floral formula and floral diagram.*
- *Learn about classification of permanent tissue (parenchyma, collenchyma, Sclerenchyma, xylem, phloem).*
- *Learn about Newman theory and Tunica carpus theory.*
- *Learn about vascular cambium, Periderm & Vascular Bundles.*
- *Know about Anatomy of root, stem and leaf of Maize and Sunflower.*
- *To know more about anatomy of stem and Anamolous secondary growth in Moringa, Dracena, Bignonea, Boerhavia and Beet root.*

BSc semester-II Paper- II **Taxonomy and Diversity of Angiosperms**

- *The students will be able to understand the classification system of Angiosperm.*
- *The students will be able to understand the plant diversity available in the region and its economic value.*
- *Know about basic principles of plant taxonomy.*
- *Know the Botanical names and families of most of the plants available in the region.*
- *The students will be able to understand the herbarium techniques.*

BSc semester-III Paper- I **Reproductive Biology of Angiosperms, Plant Growth and Development**

- *The students will be able to understand the mechanism of pollination and basic structure of the embryo.*
- *The students will be able to understand the plant growth and development.*
- *Know about plant movement.*
- *The students will be able to understand concept of photoperiodism.*

BSc semester-III Paper- II **Plant Biochemistry & Physiology**

- *Students understand the mechanism of Osmosis, Plasmolysis, Diffusion, Ascent of Sap, Transpiration & Mineral nutrition.*
- *Understand the mechanism of Biological N₂ fixation.*
- *Know about the properties of enzymes, classification and theories (Lock and Key theory & Induced fit theory).*
- *Know about mechanism of photosynthesis and respiration.*
- *Know about classification, properties, role of carbohydrates.*

- *Know about Aldoses and Ketoses.*
- *Students understand the properties and role of lipids, uses of fatty acids, oils, waxes, and sterols.*
- *Know about structure of Amino acids and Proteins.*

BSc semester-IV Paper- I

Cell Biology, Genetics and Biotechnology

- *Students learn about structure of typical plant cell and cell organelles (Mitochondria, Chloroplast, Endoplasmic reticulum, Vacuoles, Ribosome's, Lysosomes and Golgi bodies).*
- *Students understand the various steps of cell division (Mitosis and Meiosis).*
- *Understand tissue culture technique. ⊕ Learn more about Mendelism. (Law of dominance, Law of segregation and law of Independent Assortment).*
- *Know about complementary and supplementary factors.*
- *Learn about plastid and Mitochondrial DNA.*
- *Learn about mechanism of Linkages and crossing over.*
- *Know more about polyploidy mutation, chromosomal abberation.*
- *Learn mechanism of protein synthesis.*
- *Learn more about Agrobacterium plasmid, T4 bacteriophage, jumping genes, lac operar model.*

BSc semester-IV Paper- II

Plant Ecology

- *Understand about the climatic factors, Edaphic factors, Biotic Factors,*
- *Understand the concept of Food chain and food web.*
- *Understand the Ecosystem, and Environmental Pollution.*
- *Understand plant community dynamics, ecological adoption in plant and phytogeographical regions of India and local region.*

BSc semester-V Paper- I

Economic Botany I

- *Students understand the origin, Botanical description, cultivation and uses of cereal crops (Rice, Wheat, Maize, Jawar, Gram, Pigeon Pea, Lentil, Green gram and Black gram).*
- *Understand the origin, Botanical description, cultivation method and uses of Ground nut, Mustard, Sesame, Soyabean, Coconut, Linseed, Tembhurni, Charoli and Jambhul.*
- *Know about origin, Botanical description, cultivation method and uses of vegetable plants and fruit plants. (Tomato, Potato, Brinjal, Onion, Chili, Sugarcane, Mango, Papaya).*
- *Know more about origin, botanical description, Cultivation & uses of (Cotton, Jute, Sunhemp, Sisal hemp, Bamboo, Cowpea, Ferugreek and Lucerne).*

BSc semester-V Paper- II Economic Botany

- *Students gain knowledge about various plant of economic use and its importance.*
- *Understand the role of plant in human welfare.*
- *Students gain knowledge about origin, cultivation method, uses and botanical description of economical important plant (Spices, Beverages, Gum, Dye, Rubber, Timber, Bamboo, Medicines, Essential Oil, Bio-fuels) etc.*

BSc semester-VI Paper- I Mycology and Plant Pathology

- *Understand brief idea about objectives of mycology and mycological institutes in India.*
- *Understand the process of parasexuality, Homothallism, Heterothallism.*
- *Know more about classification of plant diseases, culture media preparation Koch's postulates, importance of pathogenicity in 20th century.*
- *Know more about effect of temperature, soil environment, relative humidity, rainfall, wind, light on plant diseases.*
- *Learn more about defence mechanism and hyper sensitive reaction in plants.*
- *Students know the Biological and chemical control of plant diseases. Students know about plant quarantine.*

BSc semester-VI Paper- II Mycology and Plant Pathology

- *Understand role of fungi in industrial Mycology, scope & their utility.*
- *Understands the basic information on mushroom.*
- *Understand the scope and importance of plant pathology.*
- *Understand the life cycle & Symptoms of casual agent.*
- *Know the prevention & control measure of plant disease & its effects on economy of crop.*

**MAHATMA GANDHI ARTS, SCIENCE & LATE N. P. COMMERCE COLLEGE,
ARMORI, GADCHIROLI**

DEPARTMENT OF GEOLOGY

Programme Specific Outcome- UG

- *Students will acquire a solid base of knowledge in the science of geology as a whole as well as earth materials, earth history, sedimentation and stratigraphy, deformational processes and structural features, and geomorphic processes and landforms.*
- *Students will develop proficiency in conveying complex geologic concepts in clear, technically correct writing.*
- *Students will develop proficiency in oral communication of complex geologic concepts.*
- *Students will develop the aptitudes and dispositions necessary to help democratize society by obtaining and maintaining employment as a professional geologist.*

Course Outcomes

BSc semester-I Paper- I

Physical Geology

- *Students will recognize and be able to demonstrate understanding of the earth with its comparison to other planet.*
- *Students will understand formation on the earth and their mutual interrelations and interactions (atmosphere, hydrosphere, lithosphere and biosphere).*
- *Students will understand the process of volcanoes and earthquakes with formation and effects.*
- *Students develop a cursory understanding of the soil origin.*
- *Students understanding of the hydrologic system and its sub- components (oceans and underground water) and associated geologic features.*
- *Students understanding of the hydrologic system and its sub-components (wind, rivers and glaciers,) and associated geologic features.*

BSc semester-I Paper- II

Mineralogy & Elementary Mineral Optics

- *Students develop the basic understanding of mineral formation in nature.*
- *Students understand the basic mineral properties and develop the identification skill for minerals.*
- *Students develop the understanding regarding the occurrence of minerals in nature and respective agglomerates as rocks.*

- *Students develop basic vision regarding light behaviour while studying optical properties of minerals.*
- *Students also get become accustomed with petrological microscope.*

BSc semester-II Paper- I

General Geology

- *Students understand the course with a sense of theories of Origin*
- *Students learn age of the earth*
- *Students understand to calculate age of earth by radiometric methods.*
- *Students understand relationship between Interiors structure of the earth,*
- *Students learn Isostasy concept and recognized in the field.*
- *Students understand pastclimates , glaciation with Indian Examples.*
- *Students understand and recognize the relationship between Diastrophic activity Sea-level changes.*
- *Students learn Geosyncline, Mountains and formation*
- *Students understand Sea-level changes,*
- *Students learn and recognize the relationship between Continental drifting*
- *Students learn Plate tectonics mechanism.*
- *Students learn and recognize in the field like MORB, and associated structures.*

BSc semester-II Paper- II

Crystallography and Optical Mineralogy

- *Students understand the basic crystal structure and develop various concepts of crystals.*
- *Students develop skills to classify the mineral into various crystal systems.*
- *Students develop the skill to identify the minerals on the basis of crystal shape.*
- *Students understand the basic optical behaviour of minerals and develop a skill for their identification on the basis of optical properties.*

BSc semester-III Paper- I

Igneous Petrology

- *Students understand the concept of rock origin.*
- *Student will develop the skill to classify the rock in basic types.*
- *Students understand the basics of igneous rocks, their origin, their classification, their occurrence, etc.*
- *Students develop the skill to identify the specific igneous rock on various criteria.*

BSc semester-III Paper- II

Palaeontology

- *Students will understand methods of fossil preservation and preparation*
- *Students will understand issues related to the completeness of the fossil record.*
- *Students will understand how to test scientific hypotheses in paleontology, including*

appropriate methods of data acquisition and analysis.

- *Students will understand how to best describe populations of fossil organisms and how individuals grow and populations evolve through time*
- *Students will understand how to best describe populations of fossil organisms and how individuals grow and populations evolve through time.*
- *Students will learn fundamental principles of paleoecology and better understand the science of evolutionary paleoecology.*
- *Students will understand how to recognize and properly describe new species of fossils.*
- *Students will understand the stratigraphic distribution of fossils, how to estimate true times of origination and extinction, and how to estimate rates of evolution and extinction using fossils.*

BSc semester-IV Paper- I

Sedimentary Petrology and Metamorphic Petrology

- *Students understand the origin of sedimentary & metamorphic rocks.*
- *Student develops the understanding of classification and occurrence, etc of sedimentary & metamorphic rocks.*
- *Students develop the skill to identify the specific sedimentary & metamorphic rocks on megascopic criteria.*
- *Students learn optical properties of sedimentary & metamorphic rocks and identify them on microscopic criteria.*

BSc semester-IV Paper- II

Indian Stratigraphy

- *Students will understand the historical development*
- *Students will understand the fundamental tools including subdivision of India*
- *Students will master information related to important rock succession in Peninsular and extra-peninsular india their economic importance.*
- *Students will master information related to important rock succession with economic aspect and biological perspectives*
- *Students will master information related to important rock succession with fossils records.*
- *Students understand the stratigraphic position and economic resources in Maharashtra.*

BSc semester-V Paper- I

Economic Geology

- *Student Understand the scopes of economic geology and relation other subject also learn the various process for the formation of mineral deposits also describe the variety of minerals deposits and how they are found and formed.*
- *Demonstrate knowledge of the variety of or forming processes Identify common rock type minerals found in and around ore deposits.*
- *Demonstrate knowledge silicate and non -silicate variety of or forming processes*

Identify common rock type minerals found in and around ore deposits.

- *Demonstrate knowledge silicate and non- silicate variety of or forming processes*
Identify common rock type minerals found in and around ore deposits.

BSc semester-V Paper- II

Elements of Remote Sensing and Geomorphology

- *Students understand the basic concept of remote sensing and its application in basic operations in geology.*
- *Students develop the skill to study and analyse the aerial photographs and satellite imageries.*
- *Students understand the basic concept of geomorphology and the processes responsible for its formation and development.*
- *Students develop the skill to identify the various geomorphology features and its relevance intra-disciplinary approach.*

BSc semester-VI Paper- I

Structural Geology

- *Students understand the basic concept of various geological structures and its process of formation.*
- *Students develop the skill to identify various structures like fault, fold, etc in the field.*
- *Students understand the relevance of structure in various approaches like economic geology, tectonics etc.*
- *Students learn to draw the various structural maps and its application.*

BSc semester-VI Paper- II

Elementary Hydrogeology and Environmental Geology

- *Students will recognize and be able to demonstrate understanding of the hydrologic cycle as it pertains to ground water systems.*
- *Students demonstrate understanding of surface water and ground water systems using the theories of hydraulically connected systems to predict the influence of pumping wells on availability of water in surface bodies.*
- *Students will be learn and be able to understanding of aquifers, aquitards, aquicludes, confined aquifers and unconfined aquifers.*
- *Students will be learn and be able to understand of hydrogeological properties, Indian groundwater provinces and watershed management.*

Environmental Geology

- *Students will understand impacts of geologic hazards on humans.*
- *Students will understand impacts of environment. Soil types, degradation and mitigation, pollution.*
- *Students will see the impacts of geologic processes on humans.*
- *Students will investigate problems of water resource like large dams, reservoirs, and tunnels.*
- *Students will understand impacts of water and air pollutions*

Programme Specific Outcome- PG

- *Students are trained to be an expert in multilevel aspects of geology.*
- *Students achieve a sound technical knowledge about all sort complex concepts in geology.*
- *Students can view the various geological problems professional.*
- *Students can deal and provide solutions on different geological problems related to hydrogeology, petrology, mining, etc.*
- *Ultimately on completion of post graduate degree in geology the student became an individual with deep understanding of geology in every manner.*

MSc semester-I Paper- I Mineralogy and Crystallography

- *Students develop proficiency over advanced level mineral properties and unique identification skill over it.*
- *Students develop the proficiency over the occurrence of minerals in specific with respective crystallization history.*
- *Students will be able under the various facets crystals study and develop proficiency over it.*
- *Students develop professional skills to classify the mineral into various crystal systems.*

MSc semester-I Paper- II Igneous Petrology

- *Students develop the proficiency over igneous rocks and their classification.*
- *Students develop the proficiency over igneous rocks origin & occurrence.*
- *Students develop the professional skill to specify igneous rock on various criteria.*
- *Students understand the crystallization history of igneous rock as well which intern helps to explain the origin of various minerals assemblages.*

MSc semester-I Paper- III Metamorphic petrology and Geological Mapping

- *Students develop the proficiency over metamorphic rocks and their classification.*
- *Students develop the proficiency over metamorphic rocks origin & occurrence.*
- *Students develop the professional skill to specify metamorphic rock on various criteria.*
- *Students understand the depositional history of metamorphic rock as well which intern helps to explain the origin of various minerals assemblages & respective thermodynamic situation.*
- *Students get expertise in mapping skills and develop a tempo of mapping in various geological fields.*

MSc semester-I Paper- IV Stratigraphy and Indian Geology

- *Students will develop the proficiency over historical geology.*

- *Students will develop the proficiency over fundamental tools for the interpretation of earth history.*
- *Students will develop the proficiency over inter-disciplinary approaches about earth geological history.*
- *Students will develop the proficiency over various stratigraphic columns in Indian subcontinent. .*

MSc semester-II Paper- I

Sedimentary, Geostatistics and Computer Application in Geology

- *Students will develop the proficiency over sedimentary rocks and its classification.*
- *Students will develop the deep understanding of sedimentary rock origin and its respective occurrence.*
- *Students develop the professional skill to identify the specific sedimentary rocks.*
- *Students develop the technical attitude in terms of fundamental statistics and computer software used in geological studies.*

MSc semester-II Paper- II

Palaeontology and Applied Paleobiology

- *Students will develop the proficiency over scientific approach to palaeontology, including appropriate methods of data acquisition and analysis.*
- *Students will understand how to best describe populations of fossil organisms and how individuals grow and populations evolve through time*
- *Students develop the professional skill to recognize and describe various species of fossils.*
- *Students develop the stratigraphic correlation with fossil and their evolution history.*
- *Students get a touch of various application of palaeontology in various fields of geology.*

MSc semester-II Paper- III

Geochemistry and Instrumentation Techniques

- *Students will develop the proficiency over the geochemical system established in earth system.*
- *Students will develop the proficiency over migration of various elements through various cycles.*
- *Students will understand the functioning and operation of various instruments used for analysis specifically to geochemical studies.*

MSc semester-II Paper- IV

Structural Geology, Geodynamics and Tectonics

- *Students understand the concept of geological structures and its origin.*
- *Students develop proficiency to identify various structures and their origin history.*
- *Students understand the dynamism of earth and its correlation with structural geology.*
- *Students develops and understanding about the tectonics and related aftermaths.*

MSc semester-III Paper- I
Hydrogeology & Watershed Management

- *Students develop the proficiency over hydrogeological aspects in any geological setup.*
- *Students can exhibit the surface water and ground water systems using various theories to predict the influence of various factors.*
- *Students understand the basic concept of watershed management and its applications.*
- *Students develop the significance and a proficiency over watershed management for sustainable development.*

MSc semester-III Paper- II
Geomorphology, Remote sensing and GIS

- *Students understand the basic and advanced concept of geomorphology and the processes responsible for respective landform development.*
- *Students develop the proficiency over various geomorphology processes and its relevance in inter-disciplinary approach.*
- *Students develop the proficiency over remote sensing and its application in basic and advanced operations in geology.*
- *Students develop the professional skill to analyse the aerial photographs and satellite imageries efficiently.*
- *Students understand the basic concept of Geographical Information System and its application in geology.*

MSc semester-III Paper- III
Environmental and engineering geology

- *Students develop the proficiency over environmental perspectives in terms of geology.*
- *Students can examine the complications related to resource management and will be able to provide sustainable solutions.*
- *Students understand the fundamental aspects of engineering geology and their applications.*
- *Students can undertake various projects related to constructions on behalf of geology.*

MSc semester-III Paper- IV
Introduction to Geology (Foundation Course)

- *Students will be able to get an opportunity to refresh their elementary understanding of geology.*

MSc semester-IV Paper- I
Ore Geology and Ore Microscopy

- *Students develop the proficiency over various ore and their classification.*
- *Students understand the process of ore origin and its relevance in economic field.*
- *Students will be able to identify various ores on the basis of physical properties.*
- *Students understand the ore microscopy and its applications*
- *Students will be able to identify various ores on the basis of optical properties.*

MSc semester-IV Paper- II

Indian Mineral deposits and Mineral economics

- *Students will get to know the Indian mineral deposits and their occurrences.*
- *Students will know the various mineral deposits abundance and characterisation.*
- *Students will understand the basic principles of mineral economic.*
- *Students will develop a deep understanding of mineral significance on economy of any country.*

MSc semester-IV Paper- III

Fuel Geology

- *Students will get to know the options available in geology as fuel.*
- *Students understand the origin, occurrence and significance of different fuels derived from geological setup.*
- *Students develop the proficiency over fuel geology as a whole and can suggest the sustainable options.*

MSc semester-IV Paper- IV

Paleobiology (Foundation Course)

- *Students will be able to get an opportunity to refresh their elementary understanding of Paleobiology.*

MAHATMA GANDHI ARTS, SCIENCE & LATE N. P. COMMERCE COLLEGE,
ARMORI, GADCHIROLI

DEPARTMENT OF PHYSICS

Programme Specific Outcomes

- *It explains the various laws that govern the physical world.*
- *It gives us a temperament to understand and elaborate the physical phenomenon.*
- *It also inculcates a techno-temperament among the students for the development of the technology based applications.*

Course Outcomes

BSc semester-I Paper- I

Mechanics and Relativity

- *Understand the basic concepts of Classical Mechanics like laws of motion, centre of mass, momentum and energy, collision, dynamics of rigid body, rotational motion.*
- *Understand space and time coordinate transformation in relativistic motion using Lorentz Transformation. They will become familiar with fascinating concepts in Special Theory of Relativity viz. time dilation, variation of mass with velocity, length contraction, twin paradox, addition of velocities, etc.*
- *Have clear picture of mass energy equivalence relation and its applications.*
- *Understand how major concepts developed and changed over time.*
- *Experience the diverse applications of classical mechanics.*
- *Capable of analysing and solving problems using oral and written reasoning skills based on the concepts of classical physics and special theory of relativity.*
- *Acquire a foundation for advanced courses in physics.*

BSc semester-I Paper- II

Gravitation & Elasticity

- *Understand the basic concept Newton's law of gravitation.*
- *Understand the logical knowledge about artificial satellite.*
- *Learn about GPS system.*
- *To know about Simple Harmonic Motion.*
- *Understand the basic concept of elasticity.*
- *Understand the logical knowledge construction of dam, building etc.*
- *Understand the basic concept of viscosity.*
- *Understand the logical knowledge about sprayer, atomizer and lift of an aeroplane.*
- *Know the basic concept of Bernoulli's theorem and Poiseuille's equation.*

BSc semester-II Paper- I

Vector Analysis and Electrostatics

- *Understand the basic concepts vectors and vector analysis and its applications in Physics.*
- *Understand the basic theories in electrostatics such as electric field, electric dipole, electric quadrupole, electric potential, electric flux, Gauss' law and its applications to find out electric field, relation between electric field and electric potential.*

- *Develop the understanding of electric field in dielectric, capacitance, various types of capacitors, displacement vector, polarization in dielectric and use of it in practical applications.*
- *Develop skill to solve numerical problems on it.*
- *Acquire a foundation for advanced courses in physics*

BSc semester-II Paper- II
Magnetostatics & Electromagnetic waves

- *Understand the basic knowledge about faraday's law of electromagnetic induction.*
- *Understand the basic knowledge about transformer.*
- *Understand the basic concept kirchoff's law.*
- *Knowledge about Maxwell's equations.*
- *Understand the basic concept electromagnetic waves.*
- *Understand the basic concept about diamagnetic , paramagnetic and ferromagnetic material.*

BSc semester-III Paper- I
Thermal Physics

- *Understand the Kinetic theory of gases.*
- *To know about Monoatomic, Diatomic and Polyatomic gases.*
- *Understand the concept of Thermodynamics, Law of Thermodynamics.*
- *Understand the concept of Entropy.*
- *Understand the Clausius – Clapeyron Equation, Joule – Thomson effect, Porus – plug experiment and its application.*
- *Develop skill to solve numerical problem on it.*
- *Acquire a foundation for advanced courses in physics.*

BSc semester-III Paper- II
Radiation and Statistical Physics

- *Develop understanding of black body, black body radiation, temperature dependence of black body radiation spectra, failure of classical theories like Wien's distribution law, Rayleigh – Jeans law to explain black body radiation spectra.*
- *Learn Plank's quantum postulates, Plan's energy distribution law.*
- *Understand the principles in statistical physics, mainly for systems in thermal equilibrium.*
- *Understand quantum and classical statistical mechanics for ideal systems, and be able to judge when quantum effects are important. The student should understand the connection between microphysics and thermodynamics.*
- *Use statistical principles in a wide range of applications.*
- *Acquire a foundation for advanced courses in physics.*

BSc semester-IV Paper- I
Waves, Acoustics and Laser

- *Understand the Lissajous figure, application of lissajous figure and the Optical method.*
- *Understand the Wave motion and Relation between Group velocity and Phase velocity.*

- *To know about Ultrasonic wave, Properties and Application.*
- *Understand the Noise and Music. And characteristics of musical sound.*
- *Understand the Types of Laser, Properties and Application of Laser.*
- *Develop skill to solve numerical problem on it.*
- *Acquire a foundation for advanced courses in physics.*

BSc semester-IV Paper- II

Optical Physics

- *Understand the basic concepts of Light Waves and properties of light waves like interference, diffraction, wavefront, phase change on reflection, interference in thin film due to reflected and transmitted light in parallel film, Haidinger Fringes, Fizeau Fringes.*
- *Understand Newton's Ring experiment and apply skills to find out wavelength and refractive index using Newton's Ring experiment.*
- *Understand Michelson's Interferometer experiment and apply skills to find out wavelength, wavelength difference, refractive index and visibility of fringes using Michelson's Interferometer.*
- *Differentiate between Fraunhofer and Fresnel diffraction. They will learn Half-period zones, zone plate, diffraction due to straight edge and narrow slit.*
- *Understand theory of diffraction grating and its application to find wavelength.*
- *Explain the physics of polarisation, different methods for the production of polarisation by reflection, double refraction. They will be able to explain Brewster's law, Nicol's prism and its applications, quarter and half wave plate.*
- *Develop skill to solve numerical problems on it.*
- *Acquire a foundation for advanced courses in physics.*

BSc semester-V Paper- II

Elements of modern Physics

- *Understand about Schrodinger's Equations.*
- *Understand the concept of Eigen value and Eigen equation.*
- *Understand the logic of tunneling.*
- *To know about size of nucleus.*
- *Understand the knowledge about Binding energy.*
- *Understand about radioactivity.*
- *To know about emission of α , β and γ emission .*
- *Understand knowledge about liquid drop model.*
- *Understand basic knowledge about Nuclear Fission.*
- *To know about nuclear fusion and staller energy*

BSc semester-V Paper- II

Solid State Physics

- *Understand the Crystal structure, and Types of lattices.*
- *To know about Diamagnetic, Paramagnetic and Ferromagnetic material and Weiss's theory of Ferromagnetism.*
- *Understand the Three electric vectors E, D and P.*
- *Understand the Energy band picture of conductor, semiconductor and insulator and Kroning Penny Model.*

- *Understand the Theory of superconductivity and Types.*
- *Develop skill to solve numerical problem on it.*
- *Acquire a foundation for advanced courses in physics.*

BSc semester-VI Paper- I

Nuclear & Particle Physics

- *Understand the knowledge of constituent of nuclei.*
- *To know about Binding Energy and Packing fraction.*
- *Understand about different nuclear models.*
- *Understand the concept of nuclear force.*
- *To know about exo, endo reactions.*
- *Understand the concept of magic number*
- *To know about nuclear reaction.*

BSc semester-VI Paper- II

Digital and Analog Circuits and Instrumentation

- *Understand the Digital circuits and Types of number system.*
- *understand the Types of Logic gates.*
- *Understand the Semiconductor devices and Application.*
- *To know about Power supply and Types of Rectifiers.*
- *Understand the Transistors and Classification of Amplifiers.*
- *Understand the Operational Amplifiers and application of Operational Amplifiers.*
- *Develop skill to Digital and Analog circuits on it*

**MAHATMA GANDHI ARTS, SCIENCE & LATE N. P. COMMERCE COLLEGE,
ARMORI, GADCHIROLI**

DEPARTMENT OF COMPUTER SCIENCE

Program Specific Outcomes:

- **Foundation of mathematical concepts:**
To use mathematical methodologies to crack problem using suitable mathematical analysis, data structure and suitable algorithm.
- **Foundation of Computer Science:**
The ability to interpret the fundamental concepts and methodology of computer systems. Students can understand the functionality of hardware and software aspects of computer systems.
- **Foundation of Software development:**
Foundation of Software development

Course Outcomes:

Sem-I(CBCS)

Paper-I (INFORMATION AND COMMUNICATION TECHNOLOGY)

- *Understand the History of Computers.*
- *Understand What is Computer and Basic concepts of computer.*
- *Aware about various types of Computers, types of input and output devices.*
- *Preparation of Algorithm and Flowchart of Program.*
- *Learn computer networks, its types and basics of Internet.*
- *Understand computer viruses and its types.*

Paper-II (PROGRAMMING TECHNIQUES & INTRODUCTION TO 'C')

- *Develop their programming skills.*
- *Be familiar with programming environment with C Program structure.*
- *Declaration of variables and constants.*
- *Understand operators, expressions and preprocessors.*
- *Understand arrays , it's declaration and uses.*

Sem-II (CBCS)

Paper-I (OPERATING SYSTEM & LINUX)

- *Know about functions and services of operating system.*
- *aware about different CPU scheduling algorithms*

- *Get familiar with different memory management techniques.*
- *Understand different disk and drum scheduling algorithms as well as deadlock Concepts.*
- *Get introductory knowledge about android operating system.*

Paper-II (STRUCTURED Programming With ‘C’)

- *Design programs using Functions, Pointers , Structures and Unions in C language.*
- *Write a program using File Handling.*
- *Writing programs for drawing different graphical shapes.*

Sem-III(CBCS)

Paper-I (DATABASE MANAGEMENT & SYSTEM ANALYSIS)

- *Get aware of Describing & storing data.*
- *Know about E-R Model by overview of database design..*
- *Get familiar with Conversion of ER to Relational model.*
- *Know about functional dependency and Data Normalisation.*
- *Understand Database Implementations.*
- *Make use of Concurrency control, Backup & recovery for large or huge of databases.*
- *Get aware about handling huge databases.*

Paper-II(OBJECT ORIENTED PROGRAMMING WITH C++)

- *Be familiar with Object Oriented Programming Environment.*
- *Differentiate between Structures oriented programming and object oriented programming.*
- *Understand different object modelling techniques and analysis like Generalization ,*
- *Aggregation and Metadata.*
- *Write Reusable , Extensible and Robust programs in C++.*

Sem-IV(CBCS)

Paper-I (ALGORITHM & DATA STRUCTURES)

- *Know what is data structure and basic algorithmic notations.*
- *Analyze the time and space requirement of any algorithm.*
- *Understand different linear data structures for conversion of mathematical expressions and polynomial representations.*

- *Know the file structures.*

Paper-II (VISUALBASIC & INTRODUCTION TO .NET)

- *Get aware about .Net platform.*
- *Understand looping structure, control flow statements and exception handling in VB.NET*
- *Understand object oriented programming in VB.NET*
- *Program using ADO.NET*

Sem-V (CBCS)

Paper-I (E-Commerce & Web Designing)

- *Use page layout, styles and text balance, site map, Master pages and content Pages, Navigation controls: Tree view, site map path(bread crumb), Menu navigation.*
- *Understand how to design website with different website development models.*
- *Know the different page types on websites and it's navigations.*

Paper-II(Database Programming with Oracle)

- *understand features and data types in SQL server.*
- *create and manipulate databases for various applications.*
- *use procedures and trigger for performing complex operation on databases.*
- *handle errors using exception handling concepts.*
- *Get aware of Describing & storing data.*
- *Understand Database Implementations.*

Sem-VI (CBCS)

Paper-I (CORE JAVA)

- *Get knowledge JDK Environment.*
- *Explore polymorphism using Function and Operator Overloading ,overriding .*
- *Understand the different aspects of hierarchy of classes and their extensibility.*
- *Understand the concepts of streams and files .*
- *Write programs for handling runtime errors using exception.*

Paper-II (PYTHON PROGRAMMING)

- *To acquire programming skills in core Python.*
- *To acquire Object Oriented Skills in Python*
- *To develop the skill of designing Graphical user Interfaces in Python*
- *To develop the ability to write database applications in Python*

Mahatma Gandhi Arts Science and late NP Commerce College armori Gadchiroli

Department of Microbiology

Program specific outcome UG

- *Microbiology is nothing but the seeing unseen world and Microscope is the key to open the world of microbiology.*
- *Applied Microbiology gives various biological routes to make environmental pollution free.*
- *Understand the concept of genetic and DNA technology.*
- *Student will acquire the solid base knowledge related to the medical field and immune system of human.*
- *Students will develop awareness regarding to diseases and their transmission.*
- *Good laboratorial practices develop many opportunities related to the Research oriented skill.*

Course outcome

B.Sc Semester 1

Paper-I fundamental of microorganism microbiology

- *To study deep about the microorganism and get information about their history and development*
- *Scientists give their theories to clear the ideas about microorganisms and their world*
- *To study the prokaryote and eukaryotes.*
- *Students start understanding the principle and classification of bacterial taxonomy.*
- *Students clear the concept regarding to the history and classification of viruses, archaebacteria and fungi.*

Paper -II Microbial techniques

- *Student initiated by understanding history and types of microscope and their mechanism.*
- *To study and understand the construction, working mechanism and application of different type of microscope.*
- *student get know more about the principle and procedure of staining and their classification understanding the preparation of pure culture.*
- *Characteristics of Ideal disinfectant. Microorganisms control by physical and chemical agent and mode of action of antibiotics.*

Semester II

Paer -I General Biochemistry

- *To study the principle of bio-chemicals, various type of isomers and bonds with their importance.*
- *Students Acquire the information of different types of amino acids and proteins.*

- *To understand the definition, classification and biological significance and structure of Carbohydrate and lipids.*
- *Students get understand the definition and composition of nucleic acid and the structure of DNA and RNA.*

Paper-II Applied Microbiology

- *Student started understanding the definition and composition of air and their different types of sources of microorganism in air.*
- *To study and understand the types of water and sewage water with sources of microorganisms. Different types of method to treat the water and sewage water.*
- *To study the composition of milk and various sources which can contaminate milk and cause milk borne diseases.*

Semester III

Paper-I : microbial physiology and metabolism

- *Student start the session by understanding the concept of phases of growth curve.*
- *To study brief about the enzymes, their properties and Kinetics.*
- *Student understand the concept of different type of Pathways and cycles.*
- *To clear the concept of alcohol and lactose fermentation pathway.*

Paper-II food soil microbiology and microbial Ecology

- *Students learn more about sources of contamination of food and get mire about of food borne diseases, infections and food poisoning.*
- *Students will understand significance of microorganisms in soil and important elemental mental cycles.*
- *students will know more about understanding the association of bacteria with each other for their growth.*
- *Study of environmental biotechnology.*

Semester IV

Paper I Industrial microbiology

- *Students will acquire a knowledge about the scope and basics of industrial microbiology, also the stage of fermentation.*
- *To study about the raw material used for fermentation processes and importance of microorganisms.*
- *Student understand the whole process of Upstream and Downstream process.*
- *Students learn different types of products and their recovery by industrial processes of fermentation and product recovery operations.*

Paper -II microbial Genetics and Molecular Biology

- *Student increase their knowledge by understanding the concept of gene Regulation and gene action.*
- *Students will learn frequency and types of mutation and enzymes involve in replication.*

- *To understand synthesis and process of transcription and translation.*
- *To get more information about genetic recombination.*

Semester V

Paper-I medical microbiology

- *Student learn more about the different medical term and stages of infectious diseases.*
- *To study more about the transmission of diseases and agents involve in Transmission.*
- *To understand difference of pathogenicity and virulence.*
- *To get information about different type of diseases and study the pathogenic microorganisms.*

Paper-II Bioinstrumentation

- *Students understand the concept of electromagnetic radiation and spectrophotometer.*
- *To study brief account of different type of chromatography.*
- *To clarify the concept of electrophoresis and different types of blotting techniques.*
- *To study basic principle and different type of centrifugation techniques.*

Semester VI

Paper-I Recombinant DNA technology

- *To study history and fundamental tool for rDNA technology.*
- *To study in vitro construction of rDNA molecule isolation and transfer into suitable host.*
- *To study the construction of gene library also the principle and method of PCR technique.*
- *To study the application of products of rDNA technology.*

paper-II immunology

- *student develop the basic knowledge about the function of immune system.*
- *Students also get more informative about how immunity of the host work.*
- *Students acquire the information about antigen, antibody and their reaction with different applicable methods.*
- *Session end with studying hypersensitivity and autoimmunity.*

MAHATMA GANDHI ARTS, SCIENCE & LATE N. P. COMMERCE COLLEGE,

ARMORI, GADCHIROLI

DEPARTMENT OF MATHEMATICS

Programme specific outcome – UG

- Build logic to deal with problems in mathematics.
- Make students understand the basic structure of mathematics i.e. sets, relation and functions and relation among them.
- Develop the ability to understand concepts in mathematics on their own.

COURSE OUTCOMES :-

B.Sc. Semester I:- Paper I

DIFFERENTIAL AND INTEGRAL CALCULUS

After completion of this course students will be able to :

- *Revise concepts of limit, continuity and differentiability.*
- *Learn Mean Value Theorems and their applications.*
- *Deal with Taylor's series, Maclaurin's series of $\sin x$, $\cos x$, $\exp(x)$, $\log(1+x)$ etc.*
- *Learn the concepts of Beta and Gamma function and their properties.*
- *Learn the advanced technique to solve double integral.*

B.Sc. Semester I:- Paper II

DIFFERENTIAL CALCULUS AND TRIGONOMETRY

After completion of this course students will be able to :

- *Find limit, continuity of two variable functions.*
- *Understand partial differentiation and various method to find them.*
- *Learn about homogeneous functions, Taylor's series of two variable functions.*
- *Find minima and maxima using Lagrange's multiplier method.*
- *Learn tracing of curves, find tangent and normal of curve.*
- *Deal with complex functions, finding roots of complex numbers.*
- *Learn circular and hyperbolic functions.*
- *Learn De'moivre's theorem and its applications.*

B.Sc. Semester II:- Paper III

ORDINARY DIFFERENTIAL EQUATIONS AND DIFFERENCE EQUATIONS.

After completion of this course students will be able to :

- *Deal with first order differential equation.*
- *Find integrating factor.*

- Deal with linear equations, Bernoulli's equation and first order higher degree equations solvable for x, y, p .
- Find orthogonal trajectory.
- Solve simultaneous differential equations.
- Solve linear equation with constant coefficients by finding complementary function and particular integral.
- Deal with Cauchy- Euler's equation.
- Find wronskian and its properties.
- Solve differential equation using method of variation of parameter.
- Form difference equation.
- Solve linear difference equation.
- Deal with Homogeneous linear equation with constant coefficient and non-homogeneous linear equations.

B.Sc. Semester II:- Paper IV

PARTIAL DIFFERENTIAL EQUATION

After completion of this course students will be able to :

- Understand linear partial differential equation of first order and formation of partial differential equation by eliminating the arbitrary constants and arbitrary functions.
- Solve total differential equation, Lagrange's linear partial differential equation.
- Solve various types of partial differential equations, such as

$$f(p, q) = 0$$

$$z = px + qy + f(p, q)$$

$$f(z, p, q) = 0$$

$$f(x, p) = g(y, q)$$
- Solve partial differential equation using Charpit's method.
- Solve homogeneous partial differential equation with constant coefficient by finding complementary function and particular integral.
- Find solution of non homogeneous linear partial differential equation.
- Classify second order partial differential equation.

B.Sc. Semester III:- Paper V

REAL ANALYSIS

After completion of this course students will be able to :

- Understand the concepts of real sequence, their convergence and divergence and Cauchy convergence criterion for sequence.
- Understand the concepts of infinite real series their convergence and divergence.
- Find convergence of series by using various tests such as comparison test, P- series test, ratio test, Leibnitz's test.
- Understand the basic of metric, neighborhood, closed set, open sets.

- *Learn about metric spaces, Cauchy sequence and complete metric space.*
- *Understand concepts of Reimann integral and properties of integrable functions.*

B.Sc. Semester III:- Paper VI

SET THEORY AND LAPLACE TRANSFORMATION

After completion of this course students will be able to :

- *Gain basic knowledge of sets, subsets, classes of sets and countability of sets.*
- *Learn basic concepts of relation and types of relations.*
- *Learn basic concepts of Fuzzy sets, examples of Fuzzy sets and operations on Fuzzy sets.*
- *Understand the alpha cuts and convex Fuzzy sets.*
- *Gain knowledge about Laplace transform, its properties.*
- *Learn inverse Laplace transform and its applications on differential equations and partial differential equations.*

B.Sc. Semester IV:- Paper VII

ALGEBRA

After completion of this course students will be able to :

- *Understand the basic of groups, their various types, its properties.*
- *Learn basic of Normal subgroups, cosets, their properties.*
- *Find homomorphism and isomorphism of groups, kernel of homomorphism.*
- *Learn fundamental theorems of isomorphism.*
- *Gain basic knowledge of Ring theory, Field, subring and their properties.*
- *Learn about integral domain and characterization of ring.*

B.Sc. Semester IV:- Paper VIII

ELEMENTARY NUMBER THEORY

After completion of this course students will be able to :

- *Find greatest common divisor of more than two integers by using Euclidean algorithm and least common multiple.*
- *Solve linear diophantine equation.*
- *Gain knowledge about fundamental theorems of arithmetic and unique factorization theorem.*
- *Learn about congruence and properties of congruence.*
- *Learn about Chinese remainder theorem and Goldbach conjecture.*
- *Gain knowledge about arithmetic function, Euler's theorem, Mobius μ function, the τ and σ functions.*

B.Sc. Semester V:- Paper IX

LINEAR ALGEBRA

After completion of this course students will be able to :

- *Understand the basic concepts of vector spaces, subspaces and their properties.*
- *Learn about linearly dependence and independence and their basic properties.*
- *Learn about basis and dimension of vector spaces.*
- *Learn about linear transformation, algebra linear transformation and rank nullity theorem.*
- *Gain knowledge about Dual space, Bi dual space, adjoint of linear transformation and eigenvalue and eigenvectors of linear transformation.*
- *Learn basic concepts of Inner product space, Cauchy Schwartz inequality.*
- *Deal with orthogonal vectors, orthogonal sets and Gram Schmidt orthogonalization process.*

B.Sc. Semester V:- Paper X

MATRICES AND THEORY OF EQUATIONS

After completion of this course students will be able to :

- *Gain basic knowledge of matrices, types of matrices.*
- *Operate elementary operations on matrices.*
- *Reduce matrices to normal form.*
- *Find inverse of matrices, and row rank, column rank and rank of matrices.*
- *Solve homogeneous and non homogeneous system of linear equations by matrix inversion method, crammer's rule, Gauss Jordan elimination method.*
- *Find eigenvalues and eigenvectors of matrices.*
- *Gain basic knowledge about polynomial equations in one variable.*
- *Locate roots of polynomial by using Descarte's rule sign.*
- *Understand relation between roots and coefficients of polynomial.*
- *Find transformation of equations if there is change in sign of roots, if root is multiplied by given number.*
- *Learn Cordon's method, Ferrari's method and Descarte's method.*

B.Sc. Semester VI:- Paper XI

NUMERICAL METHODS

After completion of this course students will be able to :

- *Solve nonlinear equations $f(x) = 0$ by using various methods such as*
 - 1) *Bisection method*
 - 2) *Regula falsi method*
 - 3) *Secant method*
 - 4) *Newton- Raphson method*

- Solve linear algebraic equation $Ax = b$ by using various methods such as
 - 1) Gauss elimination method
 - 2) Partial pivoting
 - 3) Gauss- Jordan elimination
 - 4) LU decomposition method
 - 5) Gauss- Jacobi method of iteration
 - 6) Gauss- Seidel method of iteration.
- Gain knowledge about Finite difference operator, Central difference operator.
- Learn about Newton- Gregory forward and backward difference interpolation formula, Lagrange's interpolation formula, Newton's divided difference interpolation formula for unequal interval.
- Learn about various method for numerical differentiation such as
 - 1) Newton's special and general formula
 - 2) Newton's divided difference formula
- Find minima and maxima of a tabulated function.
- Learn about various methods to find integration numerically such as
 - 1) Trapezoidal rule
 - 2) Simpson's one-third rule
 - 3) Simpson's three-eight rule
 - 4) Boole's rule
- Find degree of precision and truncation error of above quadrature rule.

B.Sc. Semester VI:- Paper XII

COMPLEX ANALYSIS AND VECTOR CALCULUS

After completion of this course students will be able to :

- Learn about analytic function, Cauchy- Riemann equation and harmonic function.
- Find Mobius transformation and cross ratio of complex numbers.
- Find complex integration.
- Use Cauchy's integral theorem and Cauchy integral formula.
- Find singularities and residue of complex functions.
- Find vector differentiation and vector integration.
- Find Gradient, Divergent and curl of vector functions.
- Use of Green, Gauss and Stokes theorems.

Programme specific outcome – PG

- Provide advanced knowledge of various topics in mathematics.
- Build base which will motivate students in mathematics.
- Enhance thinking, problem solving skills, project work dealing.
- Guiding students for preparing competitive exams like NET, SET, GATE etc.

COURSE OUTCOMES :-

MSc semester I, Paper I

GROUP THEORY AND RING THEORY

After completion of this course students will be able to :

- *Learn basic of groups, types of subgroups, isomorphism theorems and automorphisms.*
- *Understand concepts direct products, Sylow theorems.*
- *Learn about Ideals and Zorn's Lemma.*

MSc semester I , Paper II

REAL ANALYSIS

After completion of this course students will be able to :

- *Learn concepts of uniform convergence and continuity, integration.*
- *Deal, with topological manifold, smooth manifold.*
- *Gain advanced level in differentiation.*

MSc semester I, paper III

TOPOLOGY

After completion of this course students will be able to :

- *Learn basic concepts of sets, open sets, limit points, closed sets and closure.*
- *Understand compactness and homeomorphism*
- *Learn T_0 , T_1 , T_2 spaces and sequences.*

MSc semester I, paper IV

LINEAR ALGEBRA

After completion of this course students will be able to :

- *Learn about vector spaces, linear combination, linear dependence, linear independence.*
- *Deal with matrices and system of equation.*
- *Understand concept of Inner Product Spaces, Gram Schmidt orthogonalization and Jordan canonical forms.*

MSc semester II, paper I

FIELD THEORY

After completion of this course students will be able to :

- *Learn Unique factorization domains, Principal Ideal domains, Euclidean domains and polynomial rings over unique factorization domain.*
- *Understand the concept of Automorphism group, fundamental theorem of Galois theory.*
- *Learn Irreducible polynomial and Eisenstein criterion.*

MSc semester II, paper II

LEBESGUE MEASURE THEORY

After completion of this course students will be able to :

- *Learn measurable sets and lebesgue measure and measurable functions.*
- *Deal with Riemann integral and general Lebesgue integral.*
- *Learn differentiation of monotone functions and an integral.*
- *Learn L^p spaces, the Holder and Minkowski Inequality.*

MSc semester II, paper III

ADVANCED TOPICS IN TOPOLOGY

After completion of this course students will be able to :

- *Learn advanced concepts of topological properties.*
- *Learn Quotient topology, Urysohn's metrization theorem and paracompact spaces.*
- *Understand concepts of Nets and filters.*

MSc semester II, paper IV

CLASSICAL MECHANICS

After completion of this course students will be able to :

- *Understand Hamilton's principle, and Lagrange's equations.*
- *Learn about Legendre transformations, Routh's procedure and oscillations.*
- *Deal with equations of motion and conservation theorems in the poisson bracket formulation.*

MSc semester III, paper I

COMPLEX ANALYSIS

After completion of this course students will be able to :

- *Understand how to find limit, derivative, integration of complex functions.*
- *Learn about power series, zeroes and singularities of complex functions.*
- *Learn concept of linear transformation, Mobius transformation.*

MSc semester III, paper II

FUNCTIONAL ANALYSIS

After completion of this course students will be able to :

- *Understand Banach spaces, natural embedding of N .*
- *Learn open mapping theorem, Hilbert spaces and orthonormal sets.*
- *Understand finite dimensional spectral theory, matrices, determinant and spectrum of an operators.*

MSc semester III, paper III

MATHEMATICAL METHODS

After completion of this course students will be able to :

- *Learn how to find Fourier transform, Fourier series, finite Fourier cosine and sine transform and multiple Fourier transform.*
- *Evaluate integral, find solution of differential equations.*
- *Understand concepts of Laplace transform, inverse Laplace transform, their properties and applications.*
- *Understand the Hankel transformation and it's properties.*
- *Understand the Mellin transformation and it's properties.*

MSc semester I, paper IV

OPERATIONAL RESEARCH I

After completion of this course students will be able to :

- *Deal with linear programming problems by using Simplex method.*
- *Deal with transportation problems and assignment problems.*
- *Understand the concepts of Dynamic programming.*
- *Deal with games and strategies.*

MSc semester IV, paper I

DYNAMICAL SYSTEMS

After completion of this course students will be able to :

- *Understand dynamical systems and vector field.*
- *Find whether differential equation has solution or not that is existence of solution of differential equation.*
- *Understand nonlinear sinks, stability and Liapunov function.*
- *Understand the Poincare Bendison theorem and it's applications.*
- *Understand asymptotic stability of closed orbits and discrete dynamical systems.*
- *Check uniqueness and continuity of non-autonomous differential equations.*

MSc semester IV, paper II

PARTIAL DIFFERENTIAL EQUATION

After completion of this course students will be able to :

- *Understand the concepts of partial differential equations, classification of integral.*
- *Understand Charpit's method and Jacobi method of solving partial differential equations.*
- *Learn Quasi linear equations, non linear first order partial differential equations.*
- *Deal with second order partial differential equations.*
- *Learn about Laplace's equation, Duhamel's principle and families of equipotential surfaces.*

MSc semester IV, paper III

INTEGRAL EQUATIONS

After completion of this course students will be able to :

- *Understand basic concepts of integral equations, types of kernels, Leibnitz's rule and connection with differential equation.*
- *Find solution of Fredholm integral equations.*
- *Understand concepts of Hilbert Schmidt theory, complex Hilbert space, gram Schmidt orthogonalization process.*
- *Find Schmidt's solution of the non homogeneous Fredholm integral equation of second kind.*
- *Find solution of Volterra integral equation of second kind by successive substitution and successive approximation.*

MSc semester IV, paper IV

OPERAYIONAL RESEARCH II

After completion of this course students will be able to :

- *Understand concepts of integer programming*
- *Learn advanced techniques of goal programming and linear programming problem.*
- *Understand the concepts of queueing theory.*
- *Understand the concepts of nonlinear programming and methods.*
